We would like to acknowledge the tremendous support provided by the National AIDS Resource Center (ARC) for IT Support and for the design of all of ICASA 2011 Promotional and Communication materials.

**Message from H.E. Mr. Meles Zenawi,
Prime Minister of the Federal Democratic Republic of Ethiopia**

On behalf of the people and Government of Ethiopia, it is my distinct pleasure to welcome all delegates to Addis Ababa and the 16th International Conference on AIDS and STIs in Africa (ICASA 2011). We are honored to be hosting this major international gathering at this critical juncture in the countdown to the 2015 MDGs. Three decades following the discovery of AIDS, ICASA-2011 provides an important opportunity to take stock of the significant progress made as well as the challenges we still face in reversing the epidemic in countries across our continent.

As in many countries in Africa, Ethiopia has made great strides in expanding access to HIV prevention, treatment and in providing care and support to those affected by HIV and AIDS. New HIV infections have declined by 25% in many Sub-Saharan African countries, including ours. But while encouraging, these gains remain fragile. Our response to the epidemic will not be successful until prevention efforts are intensified. I truly believe that effective prevention is the surest 'cure' to halting and reversing the spread of HIV. Achieving our MDG 6 targets will require even more aggressive and innovative ways for addressing the social, cultural and economic factors that make people individually and collectively vulnerable to HIV infection.

It is my earnest hope that this conference yields tangible outcomes in this regard. We have before us a great opportunity for dialogue and exchange among scientists, communities, people living with HIV, leaders and development partners about recent developments and research findings, in prevention, treatment, care and support and to distil their implications for dealing with the AIDS epidemic in Africa and around the globe over the coming years. In particular, ICASA 2011 provides a unique platform for taking stock of best practices and lessons learned in African countries, with a view to crafting more effective 'African solutions' for defeating this scourge once and for all. By drawing on the wealth of knowledge and experience amassed across our region, we have a real opportunity for devising well-tailored and integrated frameworks for quality prevention, treatment and care services that will enable us to scale up towards universal access and further mitigate the impact of AIDS on the development of our nations.

I believe this year's theme is a particularly fitting one at this critical time. Against the backdrop of growing global economic uncertainty, it is vital that African countries develop innovative and sustainable strategies for mobilizing new resources—human, intellectual, and material— with a view to fortifying and sustaining our response to the epidemic over the coming years. Indeed, the challenge now is for Africa to Own, Scale-up and Sustain the fight and build on the successes of the past to finally turn the tide of the epidemic through greater containment and significantly lower new infections.

We are all looking forward to a successful and fruitful conference and wish all delegates a very enjoyable and pleasant time in Ethiopia. I hope that you will extend your stay so that you have a chance to visit the many spectacular natural, cultural and historical sites and attractions of our diverse country. No doubt, the warm hospitality of our people will exceed your expectations!

**Message de S.E. M. Meles Zenawi,
Premier Ministre de la République Fédérale Démocratique
d’Ethiopie**

Au nom du peuple et du Gouvernement de l’Ethiopie, j’ai un plaisir tout particulier à souhaiter la bienvenue à tous les délégués à Addis Abeba pour la 16ème Conférence Internationale sur le SIDA et les IST en Afrique (ICASA 2011). C’est pour nous un honneur, d’accueillir ce rassemblement international majeur, en ce moment critique dans le compte à rebours pour l’accomplissement des ODM en 2015. Trente ans après la découverte du SIDA, l’ICASA 2011 constitue une opportunité pour évaluer les progrès considérables effectués ainsi que les défis rencontrés dans nos efforts pour éradiquer l’épidémie sur le continent.

Comme beaucoup d’autres pays africains, l’Ethiopie a progressé dans le domaine de l’accès universel à la prévention, au traitement, à la prise en charge et à l’appui pour ceux atteints du VIH/SIDA. Les nouvelles infections ont diminué de 25% dans de nombreux pays d’Afrique subsaharienne, dont le nôtre. Mais bien qu’encourageants, ces gains restent incertains. La réponse à l’épidémie ne pourra être concluante tant que les efforts de prévention ne se seront pas intensifiés pour en ralentir la croissance. Il y a un véritable besoin de créer un environnement favorable à la prévention, atteindre les cibles de l’ODM 6 va nécessiter des moyens plus agressifs et innovants pour les facteurs sociaux, culturels, et économiques qui rendent les individus de manière individuelle et collective vulnérables au VIH. Je suis fermement convaincu qu’une prévention efficace est le « remède » le plus sûr pour arrêter et inverser la propagation du VIH.

J’espère de tout cœur que cette conférence produise des solutions tangibles à ce problème. Nous avons devant nous, une opportunité de dialogue et d’échanges entre scientifiques, communautés, personnes vivant avec le VIH, leaders et partenaires en développement, sur les développements récents et les derniers résultats de recherche en prévention, traitement, prise en charge et appui. Ils pourront retransmettre ce qu’ils ont tiré de leur implication dans la lutte contre le SIDA en Afrique et à travers le monde pour les années à venir. L’ICASA 2011 fournit une plateforme unique pour évaluer les meilleures pratiques et leçons apprises dans différents pays africains, dans l’optique de créer des « solutions africaines » plus efficaces pour venir à bout de ce fléau une fois pour toutes. En tirant de la richesse du savoir et de l’expérience amassée à travers notre continent, nous pourrons établir des cadres de travail intégrés sur mesure pour des services de prévention, traitement et prise en charge de qualité qui nous permettront d’accélérer la cadence vers l’accès universel et mitiger l’impact du SIDA sur le développement de nos nations.

Je crois que le thème de cette année est particulièrement important. Alors que les contraintes économiques se multiplient, il est crucial que l’Afrique développe des stratégies et ressources - humaines, matérielles, intellectuelles - durables pour augmenter l’effectivité de la réponse au VIH. Quoiqu’il en soit, le programme de l’ICASA va s’appuyer sur la richesse du savoir du continent pour pouvoir y appliquer les résultats de recherche, les leçons tirées, les méthodes de collaboration et les meilleurs cas. Le défi pour l’Afrique est de Renforcer, s’Approprier et Pérenniser ces efforts ; et de bâtir sur les succès du passé pour changer la tendance actuelle de l’épidémie pour qu’elle soit contenue et que le nombre de nouvelles infections diminue.

Nous espérons que l’ICASA sera une Conférence réussie et fructueuse et souhaitons à tous les délégués un séjour plaisant et agréable en Ethiopie. N’hésitez pas à étendre votre visite afin de profiter de nos attractions naturelles, culturelles et historiques. Je suis certain que notre hospitalité dépassera toutes vos attentes.

Message from Dr. Tedros Adhanom Ghebreyesus
*Minister of Health, Federal Democratic Republic of Ethiopia and
Patron of ICASA 2011*

It is a great honor and special opportunity for Ethiopia to be hosting ICASA-2011– the first international conference of this scale focused on AIDS to take place in Addis Ababa. Special thanks are due to the organizing committee and the numerous individuals and organizations that have supported our preparations for this major event in so many ways. This gathering provides a great opportunity for us to share the encouraging results and important lessons registered in our fight against the epidemic. Our Government's unwavering commitment to an 'integrated health system strengthening approach' to the delivery of primary health care services has been key to the progress we have made thus far. A decade ago, HIV prevalence among the 15 to 24 age group in Ethiopia was 12.4%. Today, this figure has stabilized at 2.4%. In 2005, fewer than 1,000 Ethiopians had access to ART. Today, over 333 thousand Ethiopians, an estimated 66%, of those in need are receiving ART.

Our flagship Health Extension Program (HEP) has been the central driving force. In every village across our country, pairs of health extension workers are reaching individual families with life-saving interventions and a comprehensive package of basic health care services. We are now working to scale up HEP by further empowering communities and particularly women, to manage their own health and that of their families. With the deployment of this massive 'Health Development Army', we are determined to bring about the fundamental grassroots change needed to turn back the tide of this epidemic and achieve all our health MDG targets.

But we recognize of course, that there will be critical challenges ahead. And so we are looking forward to learning from the experiences of other countries in the region and the wide range of experts, practitioners, people living with HIV, leaders and community representatives who are gathered here from all over the continent and far beyond. We are especially mindful of the urgent need to bolster our prevention efforts and ensure the long-term sustainability of our programs. ICASA-2011 is an ideal forum for deliberating new strategies and innovative collaborative initiatives for further fueling and sustaining the tremendous hope already generated in communities across our vast continent. I look forward to very fruitful discussions and I wish all participants a very enjoyable and memorable stay in Ethiopia.

Message du Dr. Tedros Adhanom Ghebreyesus

*Ministre de la Santé, République Fédérale Démocratique d'Éthiopie
et Gardien de l'ICASA 2011*

C'est un grand honneur ainsi qu'une opportunité particulière pour l'Éthiopie d'accueillir l'ICASA 2011- première conférence de cette échelle se concentrant sur le SIDA ayant lieu à Addis Abeba. Il faut tout particulièrement remercier le comité organisateur et les nombreuses personnes et organisations qui ont soutenu nos préparations pour cet évènement majeur par leurs actions. Ce rassemblement fournit une opportunité sans pareil pour partager les résultats et leçons importantes que nous avons tiré de notre lutte contre l'épidémie. L'engagement sans faille de notre Gouvernement à avoir une « approche de renforcement du système de santé », pour donner les premiers services de prise en charge a été une des clés des progrès que nous avons réalisés. Il y a une décennie, la prévalence du SIDA parmi les 15-24 ans en Éthiopie était de 12.4%. Aujourd'hui ce chiffre a été stabilisé à 2.4%. En 2005, moins de 1000 éthiopiens avaient accès aux ARV. Aujourd'hui, plus de 333 000 éthiopiens, soit près de 66% de ceux qui en ont besoin, reçoivent des ARV.

Notre Programme phare d'Extension des services de Santé (HEP) a été la force motrice derrière ces évolutions. Dans chaque village de notre pays, des équipes de travailleurs de la santé assistent des familles par le biais d'interventions salvatrices et l'accès à l'ensemble des soins et services de base en santé. Nous sommes désormais en train de renforcer le programme HEP en autonomisant les communautés, plus particulièrement les femmes, pour qu'elles gèrent leur santé et celle de leur famille. Avec le déploiement de cette « armée du développement », nous sommes déterminés à apporter les changements profonds nécessaires pour renverser la tendance de cette épidémie et atteindre tous les ODM en rapport avec la santé.

Cependant, nous sommes conscients que des défis nous attendent. C'est pourquoi nous avons hâte d'apprendre des expériences d'autres pays de la région mais aussi des nombreux experts, praticiens, personnes vivant avec le VIH, leaders et représentants des communautés venant du continent et plus loin encore, qui seront rassemblés ici. Nous sommes tout particulièrement soucieux du besoin urgent que l'on a de renforcer nos efforts de prévention et d'assurer la durabilité à long terme de nos programmes. L'ICASA 2011 est un forum idéal pour alimenter et maintenir l'espoir qui existe déjà dans les communautés à travers notre vaste continent. J'attends et je me réjouis de toutes les discussions fructueuses qui auront lieu et souhaite à tous les participants un séjour agréable et mémorable en Éthiopie.

Message from the President of the Society for AIDS in Africa (SAA)

Dear colleagues, delegates, welcome to ICASA 2011 Addis Ababa.

Once again the forefront stakeholders in the response to HIV/AIDS in Africa are meeting in Addis, the home of the African Union to address our common enemy - the HIV epidemic and related diseases.

Since the inception of the International Conference on AIDS and STIs in Africa (ICASA), organized by the Society for AIDS in Africa (SAA) after ICASA 1990 in Kinshasa, we have noticed with the support of the UN System, WHO, UNAIDS, etc... and the strong commitment of governments, communities, development partners, NGOs, CSO, scientists, health professionals, PLHIV and activists that the burden of HIV and related diseases in Africa has stabilized in the face of considerable progress in access to prevention, treatment, care and support. The platform provided by ICASA has helped increase knowledge on the virus, experience sharing, and development of strong networks and significantly reduce stigmatization in our society.

However, ICASA 2008 hosted in Senegal in 2008, under the theme "Africa's response: face the facts" recognized that despite tangible achievements in the response, HIV and AIDS are still a major burden in Africa and our people continue to get infected and to die. ICASA 2008 showed the weaknesses, challenges and strength of our response in Africa. It showed that we cannot have an adequate response without involving and targeting key affected populations and those most at risk, and calling for accountability at all levels of the AIDS response in Africa.

ICASA 2011 in Addis is being organized 30 years since the first cases of what was later identified to be HIV were reported. With the recent scientific advances in HIV treatment and prevention, the enormous impact on survival, increased requirement for second and third -line treatment, and a new threshold of when to start, means we face a huge looming patient population. Africa must prepare to harness new and emerging preventive and treatment strategies being investigated including "Test and Treat" and the possible role of "Treatment as Prevention". Commitment and constant renewal are vital. Here we are in Addis Ababa, Ethiopia, the Headquarter of AU, for ICASA 2011 whose theme is "Own, scale-up and sustain". We need the full engagement of AU in terms of conventions on public health ratified by Heads of States; we need a scientific commission to seat at the AU addressing in a truly cross-functional way the issues of HIV/AIDS, TB, Malaria and related diseases; to facilitate the step -wise implementation of universal access.

Dear Delegates, less than five years to the target date for the achievement of the MDGs, I believe that this powerful gathering of ICASA 2011 Addis will point the way forward to accomplishing our common vision of "Zero new infections, Zero discrimination, and zero AIDS related deaths in Africa".

Prof Robert Soudre,
SAA President

Message du Président de la Société Africaine Anti-Sida (SAA)

Chers Collègues, Délégués, bienvenue à l'ICASA 2011 Addis Abeba.

Une fois de plus, les intervenants de premier ordre dans la réponse au VIH/SIDA en Afrique se réunissent à Addis, ville-hôte de l'Union Africaine(UA) pour aborder notre ennemi commun- l'épidémie de VIH et les maladies qui y sont liées.

Depuis les commencements de la Conférence Internationale sur le SIDA et les IST en Afrique (ICASA), organisée par la Société Africaine Anti-SIDA (SAA), après l'ICASA de 1990 à Kinshasa, nous avons remarqué qu'avec le soutien du système de l'ONU, de l'OMS, de l'ONUSIDA, etc. et l'engagement renforcé des gouvernements, communautés, partenaires en développement, ONG, scientifiques, professionnels de la santé, PVVIH et activistes que le fardeau du VIH et de ses maladies associées en Afrique s'était allégé suite à des progrès considérables dans l'accès à la prévention, au traitement, à l'appui et à la prise en charge. La plateforme fournie par l'ICASA a aidé à augmenter le savoir sur le virus, le partage des expériences, le développement de réseaux forts et a réduit de manière significative la stigmatisation dans nos sociétés.

Cependant, l'ICASA de 2008 au Sénégal sous le thème « La Réponse de l'Afrique : Faire face aux réalités » a reconnu que malgré des résultats tangibles dans la réponse, le VIH et le SIDA restent un gros fardeau en Afrique et notre peuple continue à être infecté et à mourir. L'ICASA 2008 a montré que l'on ne pouvait pas avoir une réponse adéquate sans évoluer et viser les populations- clés et les plus à risque, et demander une responsabilisation à tous les niveaux de la réponse au SIDA en Afrique.

L'ICASA 2011 à Addis est organisée trente ans après les premiers cas de ce qui a plus tard été identifié comme étant le VIH. Avec les récentes avancées scientifiques dans le traitement du VIH et la prévention, l'énorme impact que cela a eu sur la survie, le besoin croissant pour des traitements de deuxième et troisième ligne et un nouveau seuil pour commencer le traitement signifient que nous allons faire face à une masse de patients considérable. L'Afrique doit se préparer à avoir de nouvelles stratégies de prévention et de traitement dont « Tester puis Traiter » et un rôle possible du « Traitement en tant que Prévention ». L'engagement et son renouvellement constant sont vitaux. Nous sommes ici à Addis Abeba, Ethiopie, siège de l'UA pour l'ICASA 2011 dont le thème est « Appropriation, Renforcement et Pérennisation ». Nous avons besoin de l'engagement de l'UA en termes de conventions sur la santé publique ratifiées par les chefs d'Etat ; nous avons besoins d'une commission scientifique qui siègerait à l'UA et qui aborderait les questions de Malaria, VIH/SIDA, Tuberculose et maladies associées de manière multisectorielle et fonctionnelle ; pour faciliter l'implémentation de l'accès universel.

Chers délégués, à moins de cinq ans de la date d'atteinte des ODM, je crois que ce rassemblement à l'ICASA 2011 Addis va nous guider vers notre vision commune de «Zéro nouvelle infection VIH. Zéro discrimination. Zéro décès lié au SIDA en Afrique».

Prof Robert Soudré.
Président de la SAA

Message from the Conference Chair

Welcome to the 16th ICASA, which has been jointly organized by the Government of Ethiopia in conjunction with the Society for AIDS in Africa (SAA), various institutional and community partners as well as the private sector.

This year's ICASA promises to be unique in that awards will be given to the best abstracts presented by young investigators below age 35. This recognition aims to encourage scientific research in Africa, which is currently facing challenges.

As per the tradition of ICASA, this year's conference has been divided broadly into three areas of focus, including the Scientific, Non- Abstract Driven (NADs) Sessions and the Community programmes. Each of these focus areas have been carefully developed to ensure delegates experience a rich mix of the best from around the world.

Themed around 'Own, Scale-Up and Sustain', the programme for the 16th ICASA has been developed carefully to ensure international standards, with excellent submissions from what the world is doing to respond to HIV in Africa. The choice of speakers and the various facilitators is also a reflection of the organisers' resolve to ensure high level of interaction during the conference.

Together with the International Scientific Committee members, we have developed a record 407 presentations in 150 plenary, parallel, skill-building, non-abstract driven and special sessions, all of which will provide current information on the research that is being carried out on various corners of the continent. Due to the high level of submissions, another 59 oral poster discussions have been arranged to ensure inclusion of more insights on various research findings.

In the true spirit of Ethiopian culture, the community village comprises highly creative and focused programmes, ranging from the youth pavilion to the community dialogue space. There is plenty there for all to share in best practices around Africa. Not to forget the samples of Ethiopian arts and crafts, many of which are from organisations that support PLHIV.

During this crucial time of worldwide economic recession, the theme for the 16th ICASA, Own, Scale-Up and Sustain could not have come at a better time. The high level leadership sessions will seek to engage African leaders at the highest level to commit to strategies that ensure home grown responses to the HIV pandemic. Backed by sound scientific evidence, this forum promises to come up with resolutions that should move the response in Africa to an even higher level.

To all the delegates, we wish you a fruitful ICASA 2011, and look forward to your positive engagement in the entire programme.

Dr. Yigeremu Abebe
Chair, ICASA 2011

Message du Président de la Conférence

Bienvenue à la 16ème ICASA organisée par le gouvernement éthiopien, la Société Africaine Anti-SIDA (SAA), divers partenaires institutionnels et communautaires ainsi que le secteur privé.

Cette année, l'ICASA 2011 cherche à se différencier par les prix qu'elle va décerner aux meilleurs résumés présentés par des chercheurs âgés de moins de 35 ans. Cette reconnaissance a pour but d'encourager la recherche scientifique en Afrique qui, aujourd'hui, fait face à de nombreux défis.

L'ICASA, comme à son habitude, sera divisée en trois grandes parties, soit le programme Scientifique, les sessions libres (Non-Abstract Driven Sessions) et le programme Communautaire. Chacune de ces zones de focalisation a été développée avec attention pour s'assurer que les participants profitent d'un mélange riche du meilleur de la recherche existant à travers le monde.

Tournant autour du thème « Appropriation, Renforcement et Pérennisation », le programme de la 16ème ICASA a été développé de telle sorte que les standards internationaux soient remplis, grâce à d'excellentes soumissions portant sur la réponse que l'on est en train d'apporter au VIH en Afrique. Le choix des orateurs et facilitateurs, par ailleurs, reflète la détermination des organisateurs à assurer le plus haut niveau d'interaction durant la Conférence.

Avec l'aide des membres du Comité Scientifique International, nous avons développé un total de 407 présentations compris dans 150 sessions : plénières, parallèles, libres, spéciales et ateliers, qui fourniront des informations, sur les recherches qui sont menées actuellement à travers le continent. De par le nombre élevé de soumissions, 59 présentations de discussions d'affiches ont été ajoutées pour avoir un spectre plus grand des divers résultats de recherche.

Tout en restant fidèle à la culture éthiopienne, le village communautaire comprend des programmes créatifs et orientés sur les thématiques de la Conférence, allant du Pavillon de la Jeunesse à l'Espace de Dialogue Communautaire. Ces lieux fourniront l'opportunité de partager les meilleurs cas du continent africain. Par ailleurs, il ne faut pas oublier, l'artisanat éthiopien qui sera mis en valeur par les différentes organisations présentes pour soutenir la cause des personnes vivant avec le VIH.

Durant cette période de récession économique mondiale, le thème de la 16ème ICASA, « Appropriation, Renforcement et Pérennisation », est des plus appropriés. Les sessions de leadership vont chercher à impliquer les africains, en particulier ceux se trouvant au plus haut niveau du processus décisionnel, à adopter et suivre des stratégies qui assureront des réponses locales et adaptées à la pandémie du VIH. Appuyé par des preuves scientifiques, ce forum tient à apporter des recommandations qui augmenteront le niveau de réponse au VIH en Afrique.

A tous les délégués, nous vous souhaitons une ICASA 2011 fructueuse et attendons avec impatience votre implication positive dans la totalité du programme.

Dr. Yigeremu Abebe
Président, ICASA 2011

Millennium Conference Center

AFRICA AVENUE (Bole Road)

General information

Arrival and check-in

Registered participants can pick up badges, conference bags and certificate of attendance at the Conference entrance of the Millennium conference hall during the following times:

| | |
|------------------------|---|
| Friday 2 December - | 09:00–18:00 |
| Saturday 3 December - | 08:00 – 12:00 (groups only) and 12:00 – 20:00 (all) |
| Sunday 4 December - | 08:00 – 19:00 |
| Monday 5 December - | 07:00 – 19:00 |
| Tuesday 6 December - | 06:30 – 19:00 |
| Wednesday 7 December - | 06:30 – 19:00 |
| Thursday 8 December - | 08:00 – 17:00 |

Registration provides access to the session rooms, exhibition halls, poster exhibitions, the community village, the opening and closing ceremonies.

Accompanying participants are permitted access to the opening and closing ceremonies. Only children (under 18) registered as accompanying person will be admitted to all conference sessions.

For security reasons, badges must be worn at all times for the duration of the conference.

Onsite registration

Participants can register onsite at the registration counter at the entrance of the Millennium Conference Hall. Payment can be made in cash or by credit card in USD and Ethiopian Birr.

Certificates of attendance

Certificates of attendance of the Conference will start being handed out Monday 5 December in the afternoon.

Changes of registration names

A handling fee of 60 USD will be charged for every name change to an existing Conference registration. A new registration form for the substitute delegate MUST be completed onsite.

Lost name badge

If a delegate loses, misplaces, or forgets the name badge, a handling fee of 60 USD will be charged for every replacement name badge. Upon handing out the replacement name badge, the old name badge will be de-activated and becomes invalid.

Informations générales

Accueil et inscription

Les badges, les sacs de conférence et les certificats de participation peuvent être retirés à l'entrée du centre Millenium aux dates et heures suivantes :

| | |
|-----------------------|--|
| Vendredi 2 Décembre - | 09:00 – 18:00 |
| Samedi 3 Décembre - | 08:00 – 12:00 (groupes) et 12:00 – 20:00 (pour tous) |
| Dimanche 4 Décembre - | 08:00 – 19:00 |
| Lundi 5 Décembre - | 07:00 – 19:00 |
| Mardi 6 Décembre - | 06:30 – 19:00 |
| Mercredi 7 Décembre - | 06:30 – 19:00 |
| Jeudi 8 Décembre - | 08:00 – 17:00 |

L'inscription comprend l'accès aux salles de session, à l'exposition, aux posters, au village communautaire, aux cérémonies d'ouverture et de clôture.

Seuls les enfants (moins de 18 ans) inscrits en tant qu'accompagnant sont admis à toutes les sessions de la conférence.

Pour des raisons de sécurité, le port du badge est obligatoire pendant toute la durée de la Conférence.

Inscription sur place

L'inscription peut se faire sur place au comptoir d'inscription à l'entrée du centre Millenium. Les paiements doivent être effectués en espèces ETB et USD seulement.

Certificats de participation

Les certificats de participation seront distribués aux participants à partir du Lundi 5 décembre 2011.

Remplacement des participants

Des frais de dossier de 60 USD seront appliqués pour chaque changement de participant sur un formulaire d'inscription à la Conférence. Il faut nécessairement remplir un nouveau formulaire d'inscription dans ce cas.

Perte de badge nominatif

Des frais de dossier de 60 USD seront appliqués pour tout badge nominatif perdu, égaré ou oublié. Pour remplacer le badge, le participant doit se rendre au kiosque d'inscription. Une fois le remplacement du badge effectué, l'ancien badge sera désactivé et deviendra inutilisable.

Participating in the conference

Internet access at the venue

Free Wi-Fi will be available on site. There will be two cyber cafés, the first one will be located in the Millennium Conference Hall next to Room A1: Abay, and the second one is in the Dalo Hall. Access is free of charge but is limited to 15 minutes. Printers and photocopy machines are available on site at modest charges.

Simultaneous interpretation

The official languages of the conference are French and English. Simultaneous interpretation will be provided in some conference sessions and some satellite sessions. A limited number of interpretation receivers/headsets will be available on a first-come first-served basis. Please remember to return your headset when you are finished or before the end of the day. Headsets can be collected at the distribution desk located at the entrance of the Millennium Conference Hall. In order to check-out a headset, participants must leave a valid passport or Ethiopian national identity card in its place. The passport/national identity card will be returned once the headset has been checked back into the desk.

Sign language translation will be provided during Plenary sessions.

Speakers center

All speakers, oral abstract presenters, oral poster discussion presenters, skill building workshop facilitators, invited speakers, chairpersons must check-in at the Speakers Center at least five hours before the beginning of their session. It is not possible to run PowerPoint presentations directly from a laptop in the session room: all Power Point presentations must be uploaded at the Speakers Centre at least five hours before the beginning of the session.

Chairpersons and moderators are required to collect their final session schedule and important security information and instructions at the Speakers Centre.

Catering

The conference has contracted five high-quality caterers to ensure availability of a variety of cuisines in the conference venue. Hot meals (African and other cuisines), salads, sandwiches and pastries will be sold in the food courts. Participants are responsible for the costs of food and drinks.

Positive lounge

The lounge is exclusively provided for people living with HIV (PLHIV). It is a place to rest and network for HIV positive delegates. Limited complimentary snacks, spaces for informal meetings and private facilities for taking medication are provided. The Positive Lounge is located in the Millennium Conference Hall on the right side of the registration area. It opens at 10:30-16:30 from Monday through Thursday during the Conference.

Parking

In order to access the Millennium Conference Hall parking lot, vehicles must display the official conference sticker.

Health

A first aid center is located within the Millennium Conference Hall. A medical team will be available from 7:30 to 20:30 hours. For medical problems outside of the conference center or for more serious health issues call 939.

Participation à la Conférence

Internet

L'internet sans fil sera disponible gratuitement dans le centre de conférences. Il ya deux cyber-cafés dans le centre Millenium- le premier se trouve en face de la salle A1 et le deuxième est dans l'espace d'exposition. Internet est gratuit mais limité à 15 premières minutes. Des imprimantes et photocopieurs sont accessibles, moyennant des frais.

Interprétation

Le Français et l'Anglais sont les langues officielles de la Conférence. Toutes les sessions, à l'exception de certains ateliers de renforcement des capacités et certains satellites disposent d'interprétation. Les casques peuvent être récupérés au desk de distribution à l'entrée du Centre Millennium. Pour avoir un casque, il est obligatoire de laisser en consigne une pièce d'identité pour les nationaux et son passeport pour les autres. Le passeport sera remis au participant une fois le casque rendu. La traduction en langue des signes sera assurée pendant les sessions plénières par Handicap International.

Centre de support

Le centre de support sert à assister tous les orateurs, présidents de session, facilitateurs et présentateurs de résumés et d'affiches. Tous les orateurs, facilitateurs, présidents de session et présentateurs de résumés et d'affiches doivent s'enregistrer au Centre de support au moins cinq heures avant le début de leur session. Apportez votre présentation sur une clé USB ou un CD/DVD-ROM. Assurez-vous d'en avoir une version papier. Il n'est pas possible d'utiliser un ordinateur portable pour lancer des présentations PowerPoint en salle, toutes les présentations PowerPoint doivent être chargées à partir du Centre du support au moins 5 heures avant le début de la session pour être disponibles en salle. Les présidents de session doivent retirer leur programme de session définitif ainsi que des informations et instructions de sécurité importantes au centre de support.

Restauration

Des traiteurs ont été sélectionnés pour assurer le service alimentaire sur le site de la Conférence. En dehors des heures de repas, des salades, sandwiches et viennoiseries seront vendus dans les espaces de restauration. La restauration est à la charge des participants.

Salon Positive

Le salon est réservé exclusivement aux personnes vivant avec le VIH (PVVIH). C'est un endroit où ils peuvent se reposer et réseauter avec d'autres délégués. Des rafraîchissements, espaces de rencontre et lieux pour avoir accès à leur traitement seront fournis. Le salon est situé dans le Centre de Conférences Millennium à droit de la zone d'inscription. Il sera ouvert de 10 :30 à 16 :30 du Lundi au Jeudi.

Stationnement

Seuls les véhicules ayant l'autocollant/la vignette officiel(le) de la Conférence auront accès au parc de stationnement du Millenium

Santé

Une équipe médicale sera présente dans le Centre Millennium et dans le village communautaire de 7h30 à 20h30. En dehors de ces horaires et pour des conditions plus sérieuses, veuillez appeler le 939.

Format of the conference

Plenary sessions

The plenary sessions will address the main themes of the Conference with four speakers and two chairpersons. They will review the state of research and action on major topics related to the HIV and AIDS, STI, TB and malaria epidemics. There will be four presentations each day; a total of sixteen during the conference. The sessions will bring together all conference delegates at the first session of every morning during the conference.

Special sessions

Sessions focusing on topics selected for their current and future importance in Africa. These sessions are presented and discussed by some of the world's key research leaders, high-level international AIDS Ambassadors and policy specialists and speakers in the plenary room.

Oral Abstract Sessions

Each session is organized around a specific theme. They consist of both lectures and discussions on scientific research and new knowledge or analysis that are important for understanding and responding to the HIV epidemic and its future implications.

Oral Poster Discussion Sessions

During these sessions, abstracts presented as posters will be discussed following their presentations.

Poster Exhibitions

Research findings that are not covered in the parallel sessions will be presented in a poster exhibition from Monday through Thursday. Each day there will be different posters exhibited in Dallol Hall.

Non-Abstract Driven Sessions

The non-abstract driven sessions include roundtable discussions, debates and more. The topics revolve around three main themes: Scientific, approximately 9 sessions; Leadership, approximately 15 sessions; and Community, approximately 12 sessions.

Skill Building Workshops

These sessions encourage the exchange of tools and strategies for addressing various aspects of HIV, STIs and community-based care.

Community convergence sessions

These are places for interaction among community actors who can discuss community successes, challenges and concerns regarding the provision of community and home care. They allow dialogue and spontaneity, and they put experiences and daily realities in perspective in the dialogue space at the Community Village. Each session is led by a facilitator. The schedules are available in the Program Supplement.

Satellite Symposia

The conference will partner with international institutions, organizations and pharmaceutical companies that will organize satellite symposia. These will take place every day during the Conference. The schedules are available in the Program Supplement.

Format de la Conférence

Sessions plénières

Chacune des sessions plénières quotidiennes aura 4 présentations à chaque fois. Ces présentations passeront en revue l'état de la recherche et des actions dans les principaux domaines liés aux épidémies de VIH/SIDA, IST, Tuberculose et Malaria. Il y aura en tout et pour tout 16 présentations en plénière durant la Conférence.

Sessions spéciales

Sessions organisées autour de thèmes choisis en fonction de leur importance actuelle et future en Afrique. Elles seront présentées et animées par des chercheurs renommés, des ambassadeurs de la lutte contre le SIDA et certains leaders dans la salle plénière.

Sessions orales

Ces sessions seront organisées autour d'un thème. Elles se composent de communications orales sur le thème suivies de discussions sur la recherche, les nouvelles découvertes ou analyses importantes pour comprendre et répondre à l'épidémie de VIH.

Discussions d'affiches

Durant ces sessions, les résumés sont présentés sous forme d'affiches et des discussions suivent leur présentation.

Exposition d'affiches

Les expositions d'affiches permettront de présenter des travaux ne faisant pas l'objet de présentations orales. Les expositions auront lieu du Lundi au Jeudi dans le Hall Dallol.

Les sessions libres incluent entre autres les tables-rondes, les débats et tournent autour de 3 thèmes : Scientifique: 13 sessions environ ; Leadership: 15 sessions environ ; Communautaire: 12 sessions environ

Ateliers de renforcement des capacités

Ces sessions favoriseront le transfert d'outils et de stratégies à partir d'expériences réussies dans différents domaines du VIH, des IST et la prise en charge communautaire et à domicile.

Sessions de convergence communautaire

Espaces d'interaction entre acteurs communautaires autour du succès, des défis et préoccupations de la communauté dans le domaine de la prise en charge communautaire et à domicile. Elles favorisent la prise de parole et la spontanéité et mettent en avant les expériences et le vécu au quotidien. Chaque session est animée par un modérateur et deux intervenants et a lieu dans l'espace de dialogue du village communautaire.

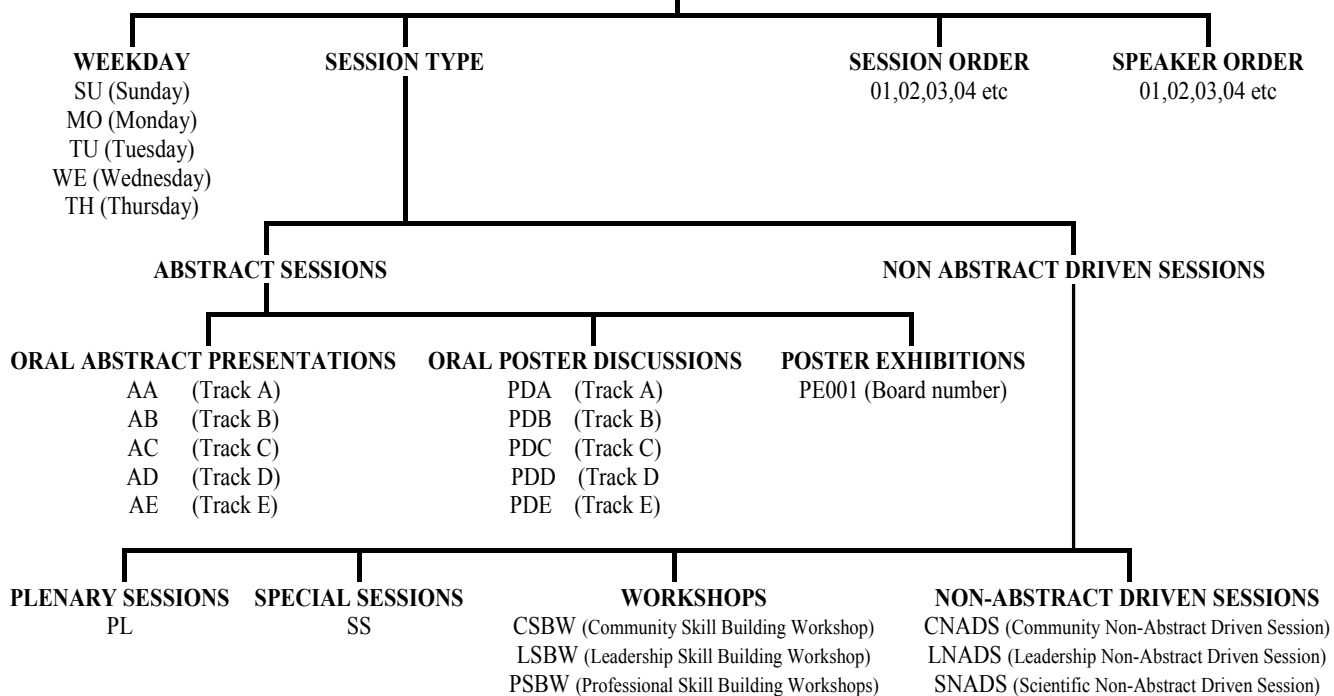

Satellite symposium

Un partenariat est mis en place avec les institutions, organisations et entreprise pharmaceutiques qui organiseront des satellites symposium. Ces satellites auront lieu chaque jour durant la Conférence, leurs horaires sont disponibles dans le supplément du programme.

Voyage à travers 30 ans de SIDA: Le Leadership Africain dans la Réponse au VIH
Meskerem Grunitzky Bekele, Togo**

Dr. Meskerem Grunitzky Bekele is Director of the UNAIDS Regional Support Team for West and Central Africa based in Dakar, Senegal, covering 25 countries in West and Central Africa (WCA). Prior to joining UNAIDS, she held a number of academic positions in Togo including Head of the Department of Infectious Disease at CHU Tokoin Teaching Hospital and Lecturer at the Faculty of Medicine at the University of Lome. She also served as Director of Togo's National AIDS and STDs Program. She joined UNAIDS in 1996 as team leader of the UNAIDS Inter-country Team for West and Central Africa and was responsible for establishing UNAIDS first regional presence in Africa. From 2000 to 2004, she was Associate Director of the Africa Division, responsible for the coordination of UNAIDS support to African countries in their response to HIV and manager of the UNAIDS-coordinated International Partnership

against AIDS in Africa. Throughout her career and for the past thirty years, Dr. Grunitzky Bekele's work focus was to build partnerships, mobilize African leaders from diverse sectors, at the highest level around HIV and AIDS. Furthermore, she has been a driving force in promoting the work of the Civil Society, in particular, People Living with HIV (PLHIV) as well as other African Regional institutions, such as the African Union, Regional Economic Commissions (RECs), First Ladies' Organizations, the Society for AIDS in Africa (SAA), and many more. Born and raised in Ethiopia, Dr. Grunitzky Bekele completed her medical studies at the Université d'Aix Marseille in France and specialized in Tropical Diseases. She is also a member of the Société de Pathologie Infectieuse de Langue Française.

**Owning and sustaining HIV response in Africa: Community perspectives and contributions
S'Appropriier et Maintenir la Réponse au VIH en Afrique : Perspectives et Contributions de la Communauté
Cheick Tidane Tall, Mali**

Dr. Cheick Tidiane Tall is the Executive Director of the African Council on AIDS Service Organizations (AfriCASO). This is a regional network that promotes and facilitates the development of HIV and AIDS community responses in Africa, through advocacy, networking, development of sustainable organizational systems and capacity building for networks and NGOs.. He is an accomplished medical doctor in the international development domain, with 19 years' professional experience in private clinic management, health and health systems issues, sexual and reproductive health, HIV and AIDS. He has extensive knowledge of community organizations working on health in

Africa and around the world. His portfolio extends to experience in proposal development and implementation, advocacy and resource mobilization. He is widely versed on the HIV and AIDS epidemic and STIs: scientific aspects, trends of evolution, policies, challenges and priorities and formulation of national responses. He is a Board Member for the developing country-NGO delegation to the Global Fund Board.

Accountability through ownership, shared responsibilities and financial sustainability
La Responsabilisation à travers l'Appropriation, les Responsabilités Partagées et la Durabilité Financière
John Idoko, Nigeria

John Idoko is the Director of the AIDS Prevention Initiative in Nigeria (APIN), a program at the University of Jos in Nigeria. He is also the Chairman of the Nigerian Antiretroviral Committee. A Professor of Infectious Disease at the University of Jos, he previously led the Jos University Teaching Hospital efforts in their PEPFAR supported care and treatment of over 13,000 patients; one of the largest ART clinics in Africa. He has undertaken extensive clinical and research work in HIV and AIDS and published several papers on the management of AIDS in Nigeria. Professor Idoko has served as the Director General of the National Agency for the Control of AIDS (NACA) since early 2009; he comes to this position with decades of experience in HIV prevention, treatment and care. A leading

expert in ART for the country, he has also developed and implemented a successful roll-out of PMTCT services to all local governments in Plateau State.

Thirty Years Response to HIV and AIDS: Situation and Response Trends in Africa
Trente ans de Réponse au VIH et au SIDA : Situation et Tendances de Réponse en Afrique
Peter Piot, Belgium

Peter Piot, MD, PhD (born 1949) a former Under Secretary-General of the United Nations, former Executive Director of the UN specialized agency UNAIDS, and a former professor at Imperial College London, is now Director of the London School of Tropical Medicine & Hygiene. After he qualified as a Doctor of Medicine at the University of Ghent (Belgium) in 1974, he co-discovered the Ebola virus in Zaire in 1976. In 1980, Peter Piot received a PhD degree in Microbiology from the University of Antwerp (Belgium). He was also a Senior Fellow at the University of Washington in Seattle. In the 1980s, Dr. Piot participated in a series of collaborative projects on AIDS in Burundi, Côte d'Ivoire, Kenya, Tanzania and Zaire. Project SIDA in Kinshasa, Zaire was the first international project on AIDS in Africa and is widely acknowledged as having provided

the foundations of our understanding of HIV infection in Africa. He was a professor of microbiology, and of public health at the Institute of Tropical Medicine in Antwerp, and the Universities of Nairobi, Brussels, and Lausanne. From 1991 to 1994, Dr. Piot was President of the International AIDS Society. In 1992, he became Associate Director of the World Health Organization's Global Programme on HIV/AIDS. On 12 December 1994, he was appointed Executive Director of the Joint United Nations Programme on HIV/AIDS (UNAIDS). He stepped down from this role in late 2008, at which time he was replaced by Michel Sidibé from Mali. He was a Senior Fellow at the Bill and Melinda Gates Foundation, a Scholar in Residence at the Ford Foundation, and held a Chair at the Collège de France in Paris in 2009-10. Dr. Piot was ennobled a Baron by King Albert II of Belgium in 1995, and has received numerous awards. He is a member of the Institute of Medicine of the National Academy of Sciences of the United States, of the Academy of Medical Sciences of the UK, and the Academies of Medicine in Belgium and France. He is fluent in three languages and is the author of 16 books and more than 500 scientific articles

MOSS01

**Special Session
Leader's Panel: Keeping the Promise in
the AIDS Response
Panel des Leaders: Tenir les promesses
dans la réponse au SIDA**

Venue: A1: Abay

Africa's leaders have expressed concerns at various monumental meetings that HIV and AIDS is a global emergency that needs to be addressed – actively, efficiently, and collaboratively. Time and again, African leaders have united to pledge support to the Abuja and Maputo declarations and MDGs in order to highlight the major commitments and necessary strides towards addressing this pressing issue. The MDGs place health squarely at the center of the international development agenda since three of the eight MDGs relate specifically to health. Countries are gaining momentum in combating the HIV and AIDS epidemic. However, challenges still exist and continue to arise, hindering the ability to fully implement the promises that have been made to fight HIV and AIDS. This session provides evidence and articulates the efforts and promises made towards the epidemic's response, challenges and way forward to ultimately fulfill these commitments.

Workshop
8 Steps How to Measure Effects on Outcome Level for SRHR and HIV Prevention Interventions for Youth
8 étapes pour mesurer l'impact des interventions en prévention du VIH et DSSR auprès des jeunes

Venue: B3:
Shalla

This workshop will provide insights and skills how to measure effects of SRHR and HIV prevention intervention for youth. The workshop reflects and is based on a toolkit that is developed with and for NGO's in Africa that work with youth on this area. The toolkit provides eight practical steps. The workshop will discuss the theory of Planned Behaviour and practice in groups the first 3 steps. Each exercise will be about participant own program. At the end of the workshop participants will develop an evaluation plan for their own program/project.

Non Abstract Driven Session
Enabling Legal Environment for HIV Response
Créer un environnement juridique favorable à la réponse au VIH

Venue: B4:
Walia

As HIV and AIDS responses are scaled up worldwide and in every sector, these responses need to be grounded in sound policies, laws and practices as well as fulfill human rights of men and women regardless of age, ethnicity, religion, class, gender or any other factor so that men and women can realize their full potential. A legal and human rights approach to gender and HIV and AIDS responses will require that interventions are rethought and redesigned to promote rights, reduce inequality and harness substantive participation of those that are most vulnerable and affected. To accelerate the efforts on prevention, treatment, care and support, it is vital to address the issue of stigma and discrimination. Does specific legislation, to criminalize the deliberate spreading of HIV, increases stigma and discrimination and, hence, discourage testing? Do we need a case specific legislation for HIV and AIDS? Or, should the emphasis be on effective use of all legislation relating to infectious diseases and human rights? What are the legal enforcement frameworks for rape and sexual violence in the context of HIV and AIDS? This session will address these questions and related issues through presentation and discussion by giving practical examples.

Special Session
Value for Money: Sustaining HIV Response
La valeur de l'argent: Maintenir la réponse au VIH

Venue: A1: Abay

We are in the midst of global financial and economic crisis forcing governments to cut on spending. Often, health programs are one of the first to suffer the brunt of shrinking financial resources. The resources made available for HIV responses to achieve Universal Access are dwindling from time to time. At this juncture, the response to HIV should introduce effective and efficient approaches of managing available resources. The principles of Value for Money are among these strategies that should be instituted to address the current funding shortages of HIV responses to achieve the MDGs. Achieving the same result with reduced cost (Economy), designing correct way of spending (Efficiency), and spending wisely (Efficiency) should all be considered to make a big difference with the limited resources available. The current way of spending in HIV sector has not taken Value for Money as one of the effective mechanisms of resource management. It is timely to observe this mechanism to scale-up and sustain the response to HIV epidemic in Africa.

Gender Based Violence and HIV Response in Africa: Rape, Sexual Assault, Access to Emergency Treatment as Post Exposure Prophylaxis
Violence basée sur le genre et réponse au VIH: Viol, accès aux soins d'urgence comme prophylaxie post exposition

Venue: A4: Tekeze

It has been documented that Africa in general and Sub-Saharan Africa in particular carries the brunt of HIV infections. In this continent gender norms, unequal distribution of power and ongoing gender-based sexual violence have enhanced vulnerability to HIV infection and exacerbated maternal and child health challenges. Despite recognition of the challenge and introduction of new policies and programs, the success in curbing the scourge is not yet enough. This session aims to explore existing exemplary experience in addressing gender-based violence in connection to HIV.

Communities of Excellence: Measuring Core Competencies of Communities to Provide Coordinated Comprehensive Care for Families Affected by HIV and AIDS
Communautés d'Excellence: Mesure des Compétences Essentielles des Communautés à Fournir des Soins Complets aux Familles Affectés par le VIH/SIDA

**Venue: A6:
Simien**

Excellence is state of possessing good and valuable qualities in an eminent degree in addressing different forms of social concerns and it is a reality that different communities around the globe have demonstrated excellence in the field of HIV and AIDS. At the end of this workshop participants will: Understand the roles of communities in providing a coordinated care at all levels through the use of case studies; Learn about the foundations of community capacity and the criteria for identification of "Communities of excellence, based on studies conducted in three countries. Identify core indicators to identify and measure core competencies of communities; learn how to use a community capacity index to measure success in communities'; and Exchange and learn from other participants examples of communities who have been able to provide comprehensive coordinated care for families and children affected by HIV.

Special Session
First Ladies' Panel: Towards an HIV Free Generation
Panel des Premières Dames: Vers une génération sans VIH

Venue: A1: Abay

In response to the call to action from both the African Summit on HIV and AIDS, Tuberculosis and other related infectious diseases; and the United Nations General Assembly on HIV and AIDS, thirty-seven African First Ladies and their representatives established the Organization of African First Ladies against HIV and AIDS (OAFLA) in 2002 to collectively combat this pandemic. The organization's major focus is to increase the capacity of First Ladies and other women leaders to advocate for effective solutions to respond to HIV and AIDS as well as against stigma and discrimination. Their engagement in addressing HIV is multi-dimensional, mainly through prevention of mother to child transmission (PMTCT), preventing child marriage, promoting women and girls empowerment, and reproductive health. This session deliberates on the efforts made and leadership provided by the First Ladies towards achieving an HIV free generation and indicates next steps to enhancing commitment and action.

Co-Moderators:

Adv. Bience P. Gawanas, Commissioner for Social Affairs, African Union Commission
 Prof. Sheila Tlou, Director of the UNAIDS Regional Support Team for East and Southern Africa

Workshop
Using New Technologies for HIV Prevention and Capacity Building: Social Media, mhealth, and ehealth
Utiliser les Nouvelles Technologies pour la prévention du VIH et le renforcement des capacités: Les médias sociaux et la Santé

Venue: A4:
Tekeze

Worldwide, it is recognized that the current HIV prevention efforts must be sustained and increased, and new efforts to expand access to treatment are critical. The main purposes of this workshop are to: Equip participants with skills and knowledge on how to use both online and offline social media platforms for HIV prevention; Equip participants with strategies on how to use mobile technology for health to halt down the number of MTCT- linking community health workers with HIV positive pregnant women in villages, slums etc; Share with participants on how to utilize free New Technologies for capacity building, provide psychosocial counseling, treatment consultation and enhance the skills of community healthcare workers and palliative care providers; and Expose and guide participants through a process of entrepreneurial thinking and identifying local, cost effective Medias for HIV prevention including new technologies.

**Non Abstract Driven Session
A Gateway for an HIV-Free Generation:
Collaborative African Leadership for
Safe Male Circumcision**
*Une issue pour une Génération sans
VIH: Une collaboration du leadership
africain pour une circoncision
masculine saine*

**Venue: A7:
Lalibela**

There is compelling evidence that male circumcision reduces the risk of heterosexually acquired HIV infection in men by approximately 60%. This has led to recommendations for safe male circumcision to be added to other HIV prevention strategies. In this session presenters will give an overview of safe male circumcision (SMC) programs in 14 targeted countries in Sub-Saharan Africa paying particular attention to challenges, costing and impact; role of political and traditional leaders in SMC and lessons learned from interface of traditional male circumcision (MC) and voluntary medical male circumcision (VMMC) in Botswana and Zimbabwe. In addition, the session will explore best practices on the use of media in promoting SMC; and the role of women in championing SMC. At the end of the session, participants will get an opportunity to ask questions, share their experiences and discuss the issue further.

Moderator:

Mugabe, Mbulawa, Botswana

MOSS04

Special Session
Ministerial Panel – Finance and Economy: Funding HIV Response
Panel ministériel – Finance et Economie: Financer la réponse au VIH

Venue: A1: Abay

To respond to the threat posed by HIV and AIDS and to increase access and accountability, African Heads of States declared HIV and AIDS as a continental emergency and pledged to allocate at least 15% of their respective countries' total budgets to improving the health sector during the Abuja Declaration in 2001. This promise has only partially been fulfilled. In addition, HIV and AIDS-related funding from the international community for low and middle-income countries reaches the projects which spend it via one (or more) of three funding streams: donations from national governments; multi-lateral/bilateral funding organizations; and private funding. Is the existing level of funding and structures adequate for HIV programming? How can the international community ensure that current global financial crisis will not adversely impact HIV funding? Program sustainability using Health System Strengthening approach, increased private sector participation, mainstreaming HIV and AIDS and integrating it with other health services and related issues are discussed during this session.

Non Abstract Driven Session
Universal Access: Are we Failing to Meet the Needs of Women and Girls?
Accès Universel: Sommes-Nous Incapables de Satisfaire aux Besoins des Femmes et Filles?

Venue: A4:
Tekeze

Universal Access means an equitable, accessible, affordable, comprehensive, measurable and sustainable advance of the most effective interventions needed to manage the diverse HIV epidemics across countries on the African continent. Each of the key ICASA 2011 themes can easily be translated into the building blocks of Universal Access. However, thirty years into the epidemic, women and girls account for 60 per cent of those living with HIV in Sub-Saharan Africa, and that 76 per cent of young people aged 15 - 24 years living with HIV are female. As programmers, policy makers, scientists, advocates and politicians need to ask ourselves the question: "are we failing to meet the needs of women and girls?" and if so, "how can we do better: scale-up quicker, with more ownership and in a sustainable manner?" This session will raise awareness on how to reach Universal Access targets, discuss and debate the progress made and identify obstacles in the implementation of key global and regional commitments relating to women, girls, gender equality and HIV and try to set priority areas and steps for accelerated action on women, girls, gender equality and HIV.

HIV and AIDS Response in Cross-
Border and Emergency Situations
*La réponse au VIH et la SIDA dans les
zones frontalières et les situations
d'urgence***

**Venue: B2:
Abiyata**

HIV and AIDS has rapidly become one, if not the most, of the alarming and devastating pandemics the world has ever seen. It is not only a considerable health problem, but also a development problem that threatens the political leadership, economic and social fabric of many nations. Relatively little attention has been paid to HIV and AIDS prevention and care in the context of humanitarian responses. Traditionally, the priorities of such efforts have included the provision of food, water, sanitation, shelter and basic health services. Due to its chronic nature, HIV and AIDS has not been considered an immediate threat to life and has, therefore, not been considered a serious issue. Meanwhile, studies have shown that the conditions associated with conflict and forced population displacement, including poverty, social instability and powerlessness, exacerbate HIV transmission considerably. Despite these facts, the response to HIV and AIDS remains limited by policy makers and practitioners. There is a need to take HIV and AIDS seriously, recognize its impact in emergencies and identify those who are most vulnerable. This session is intended to show the importance of going beyond health in response to HIV to protect the population against violence and address socio-economic vulnerabilities.

Non Abstract Driven Session
GIPA and KAPs: "Nothing About Us Without Us"
GIPA et KAP: „Rien nous concernant, sans notre consentement „

Venue: B3:
Shalla

To increase the momentum and effectiveness of the HIV response, key affected people's engagement needs to be accepted as an essential component of any HIV program strategy. HIV interventions are more effective when key affected people themselves are directly involved and have ownership in designing, implementing and monitoring programs and services. Policy makers and health providers do not always understand the realities of all or some of the key affected people. It is, therefore, essential to ensure that local experiences and realities are heard and addressed. In this session speakers make presentations on meaningful involvement of key affected populations in the HIV response in Africa; missing points in implementing GIPA; measuring the implementation of GIPA and the meaning of scorecard results. This session further provides an opportunity for participants to understand the importance and impact of the involvement of key affected people in HIV and STIs interventions.

Workshop
The Rock HIV Prevention Model: Engaging Traditional Leadership in Accelerating HIV and GBV Prevention Through Culture-Transformed Strategies
Modèle « Rock » de prévention du VIH: Engager le leadership traditionnel dans l'accélération de la prévention du VIH et des VBG par des stratégies adaptées aux cultures

**Venue: B5:
Nyala**

As much as we love our culture, it is important for our culture to protect us. We found some practices that were not protecting us but putting us at risk, for example wife inheritance. We are, therefore, working with traditional leaders to find ways of how we can practice our culture, without exposing ourselves to HIV infection". This workshop will aim to: Launch and share an interactive Package on Engaging Traditional Leaders in GBV and HIV Prevention; Equip participants with innovative skills and tools to engage traditional leadership in African; Empower participants in effective application of the Culture Dialogue Model of community driven mapping of cultural practices that promote and reduce vulnerability; Stimulate participants towards effective utilization of the Package to strategize advocacy and mobilization activities to engage traditional leaders; and Explore methods of application of the tools at all levels.

Workshop
Combination Prevention in Action: Using the Workplace as an Entry-Point
Lier la prévention à l'action: utiliser le milieu du travail comme point de départ

**Venue: B6:
Nechsar**

An HIV prevention approach based solely on one element does not work and can hinder the AIDS response. Combination prevention includes among other elements: access to information about HIV, access to treatment, harm reduction measures, waiting longer to become sexually active, being faithful, reducing multiple partners and concurrent relationships, male circumcision, ensuring human rights and the reduction of stigma. The skills building workshop will provide participants with a better understanding on how the workplace can be an entry point for comprehensive prevention. Participants will look at how interventions, from education to access to services, could be developed in a specific sector of the economy involving a number of enterprises from the public or private sector, as well as operators from the informal economy.

Health systems strengthening in Africa: Innovative technologies for HIV response in Africa
Renforcement des systèmes de santé en Afrique : Technologies innovantes dans la réponse au VIH en Afrique

John Nkengasong, Côte d'Ivoire

John Nkengasong, PhD. is the Associate Director for Laboratory Science in the CDC's Division of Global HIV/AIDS (DGHA). He also serves as the Chief of the division's International Laboratory Branch and is co-chair of the U.S. President's Emergency Plan for AIDS Relief's (PEPFAR) Laboratory Technical Working Group. Dr. Nkengasong recently spearheaded the creation of the African Society of Laboratory Medicine, where he is Chair of the Board of Directors. Dr. Nkengasong joined CDC in 1995 as Chief of the Virology Laboratory, CDC Abidjan, Cote d'Ivoire. In 2005, he joined DGHA as Chief of the International Laboratory Branch. His extensive work on HIV diagnosis, pathogenesis, and HIV Drug resistance has been consistently published since 1988, spanning over 120 papers in journals such as the Lancet, Journal of Virology, Journal of Infectious Diseases, and Journal of Clinical Microbiology. His portfolio includes

multiple published book chapters on implementation of HIV therapy in resource-challenged areas. He has received a number of awards including the U.S. Secretary of Health and Human Services Award for Excellence in Public Health Protection Research and multiple Directors' Recognition Awards. He has been nominated several times for the Agency's prestigious Shepard Award. He continues to serve on numerous international advisory boards and journal review panels. Dr. Nkengasong received a Master of Tropical Biomedical Science at the Institute of Tropical Medicine in Antwerp, Belgium, in addition to a Masters Degree in Medical and Pharmaceutical Sciences and a Doctorate in Medical Sciences (Virology) from the University of Brussels School of Medicine, Belgium. From 1993-1995, he served as the Chief of the Virology Laboratory at the Department of Microbiology, Institute of Tropical Medicine, a World Health Organization Collaborating Center on HIV diagnostics.

Where is Africa in PMTCT: Successes, challenges, and MTCT elimination**Où est l'Afrique en matière de PTME ? : Succès, défis et élimination de la TME****Chewe Luo, Zambia**

Dr. Chewe Luo is a Pediatrician and Tropical Child Health Specialist. She is currently working as Technical Team Leader for Country Program Scale-up and Senior Program Adviser for HIV at the United Nations Children's Fund (UNICEF) in New York. She has over 15 years of experience in HIV and AIDS and child health as a clinician and researcher at the University Teaching Hospital in Zambia; clinician in the UK and working with UNICEF at country, regional and headquarter levels. She has a Masters of Medicine in Paediatrics from the University of Zambia and Masters in Tropical Pediatrics and a PhD from Liverpool School of Tropical Medicine in the UK.

Combination prevention approach in the response to HIV and STIs
Approche de combinaison préventive dans la réponse au VIH et aux IST
Sheila Tlou, Botswana

Dr. Sheila D. Tlou is Director of the UNAIDS Regional Support Team for Eastern and Southern Africa. She is a former Member of Parliament and Minister of Health of the Republic of Botswana (2004-2009). She has been involved in the fight against HIV and AIDS from the time the epidemic started in Botswana in 1985, and is the founder President of the Botswana chapter of the Society of Women and AIDS in Africa (SWAA).

Dr. Tlou holds a PhD in Nursing Sciences and postgraduate Certificates in Women's health and Gender studies, from the University of Illinois at Chicago. During her term as Minister of Health, Dr. Tlou led a comprehensive AIDS response program whose achievements include a roll out of ARVs to near universal (96%) uptake. Transmission

of HIV from mother to child decreased from 40% in 2003 to about 4% in 2008, and maternal mortality due to AIDS decreased from 38% to 9%. As Chairperson of the African Union Ministers of Health in 2005, Dr. Tlou provided leadership in the adoption of the Maputo Plan of Action on Sexual and Reproductive Health and Rights. Dr Tlou also represented Eastern and Southern Africa in the Board of the Global Fund for AIDS, Tuberculosis and Malaria.

Among the award she has received include the 2002 Botswana Presidential Order of Honour, the 2002 Anna Reynvaan Award from the Amsterdam Medical Centre, the 2003 Florence Nightingale Award from the International Red Cross Society, and the 2007 Trailblazer Woman Leading Change Award from the World YWCA. She has portrayed Precious Ramotswe, the heroine of Alexander McCall Smith's Number One Ladies Detective Agency book series, in several amateur theatre productions in Botswana, and starred in the Anthony Mingella BBC Movie: The Number One Ladies Detective Agency (2008).

AIDS and the Millennium Development Goal: Working together for greater impact
Le SIDA et les Objectifs de Développement du Millénaire : Travailler ensemble pour avoir un plus grand impact
Stephen Lewis, Canada

Mr. Stephen Lewis is the co-founder and co-director of AIDS-Free World www.aidsfreeworld.org, an international advocacy organization that works to promote more urgent and more effective global responses to HIV and AIDS. Stephen Lewis' work with the United Nations spanned more than two decades. He was the UN Secretary-General's Special Envoy for HIV/AIDS in Africa from 2001 until 2006. From 1995 to 1999, Mr. Lewis was Deputy Executive Director of UNICEF in New York. From 1984 through 1988, he was Canada's Ambassador to the United Nations. In addition to his work with AIDS-Free World, Mr. Lewis is a Distinguished Visiting Professor at Ryerson University in Toronto. He also serves as a Commissioner on the newly formed Global Commission on HIV and the Law, created by the United Nations Development

Programme (UNDP) with the support of the Joint United Nations Programme on HIV/AIDS (UNAIDS). Mr. Lewis serves as the Board Chair of the Stephen Lewis Foundation, in Canada. He is a member of the Board of Directors of the Clinton Health Access Initiative and Emeritus Board Member of the International AIDS Vaccine Initiative.

Mr. Lewis holds 34 honorary degrees from Canadian universities and in June 2010 he received an honorary degree from Dartmouth College. He was appointed a Companion of the Order of Canada, Canada's highest honour for lifetime achievement, in 2003. In 2007, King Letsie III, monarch of the Kingdom of Lesotho (a small mountainous country in Southern Africa) invested Mr. Lewis as Knight Commander of the Most Dignified Order of Moshoeshoe. Named after the founder of Lesotho, the knighthood is the country's highest honour.

Special Session
Ministerial Panel – Health and Social Affairs: Making Health Systems Work to Effective HIV Response
Panel Ministériel – Santé et Affaires Sociales: Rendre les systèmes de santé efficients dans leur réponse au VIH

Venue: A1:
 Abay

To date, the HIV and AIDS response has had a far-reaching and unquestionable impact on health care globally: building infrastructure and systems, improving the quality of services, reaching socially marginalized and vulnerable groups, and engaging consumers. New investments in HIV and AIDS services have revealed existing fragilities in health systems; in some cases, it has burdened these systems by stretching overextended resources in order to meet escalating demand. The push for HIV and AIDS treatment access has not solely focused on funding, but attention has also been given to lack of human resources, poor infrastructure, insufficient supplies and other related issues. Although the HIV and AIDS response has prompted considerable new financing, the mobilization of activists and health care consumers has also forced global and national leaders toward a more vigorous sense of accountability and urgency. The challenges have stimulated different innovative approaches, and this session emphasizes the necessity of an effective health system to battle HIV and AIDS.

TULNADS08

Non Abstract Driven Session
Key Populations on HIV/AIDS: LGBT Populations-clés pour le VIH et le SIDA: GLBT

Venue: A4:
Tekeze

Homosexuality is not a matter of public discussion in most of African countries. The legal status of homosexuality does not state much about the status of homosexuals. Taboos in the general public are far more pertinent. Yet, it does not mean homosexuals do not exist in underground gay/lesbian community, but not being an issue of public discussion. Most African languages, however, have words for "gay" and "lesbian", demonstrating a traditional knowledge of the existence of this sexual orientation. The panelist will present issues related to realities and cultural challenges in Africa, discrimination on the ground of sexual orientation, HIV among LGBT groups, the public health ramifications of homosexuality, need for specific services, laws and national policies, criminalization of homosexuality and its impact on perpetuating HIV infection.

Non Abstract Driven Session Innovative Strategies to Strengthening Health Research Capacity Building in Africa Through "Research Partnerships Ethics"

Stratégies Innovantes pour Renforcer la Capacité de Recherche en Santé en Afrique à travers « l' Ethique dans les Partenariats de Recherche

Venue: A6:
Simien

Health research is a collaborative effort of multiple partners which often have different areas of competence and various levels of capacity. Effective health research partnership requires appropriate recognition of the value of the contributions of each partner. Where there is disparity in resources, as is commonly seen in collaborations between high income country and African research teams, the true worth of local and indigenous knowledge, onsite resources, personnel time, skills and the enabling environment created for successful research must be recognized alongside the financial and technical input of the better resourced partners. Equity and justice within a partnership will be beneficial to all members and strengthen capacity that guarantees sustained productivity in research. This session will explore the concepts of partnership ethics including background, experiences, mechanisms and practical tools for partnership assessment.

Abiyata**

Many African countries have developed policies and strategies to address the problem of orphans and vulnerable children as one key outcome of HIV and AIDS. Yet, the problem has persisted and currently OVC have become one of the major concerns in the HIV response efforts. This session provides opportunities to discuss on approaches, roles of communities and the family in response to OVC. It further helps to generate discussions that could contribute to improve OVC and adolescent programming.

CSOs are recognized to have played important role in HIV response in Africa. In recognition of their formidable role they have important stake in various policy forums as well as at program level. Currently, there is evidence where experiences of CSOs were picked up by community organizations to enhance the response to HIV. This session will particularly shade light on the experiences gained and outcomes thereof in response to HIV at community level and it also offers unique opportunity for CSOs in particular to learn from experiences that will be shared.

Workshop
Fighting Stigma! 5 Steps Organization
Can Take to Address Needs of Young
People Living with HIV in Regular
Program in SRHR and HIV Prevention
for Youth

Lutte contre la stigmatisation! 5
étapes à suivre par les organisations
pour répondre aux besoins des
jeunes, vivant avec le VIH, dans la
programmation régulière sur la DSSR
et la prévention du VIH pour les jeunes

This workshop will provide insights and skills on how to address the need of YPLHIV within regular SRHR and HIV prevention intervention for youth. This workshop reflects and is based on guidelines that are developed with and for NGO's in Africa that work with youth on this area. The guidelines provide 5 practical steps about how organisations can adjust their programme, these range from: increase knowledge and skills to work on attitudes, address stigma, and work on creation of a supportive environment. Within this workshop participants will discuss the needs of YPLHIV and identify areas to improve their programs in order to address needs of YPLHIV. At the end of the workshop, participants will develop an action plan based on the guidelines and checklist on what areas they want to make changes and how they can do so.

Part- 1

Workshop
Publish or Perish: How to Write a
Research Manuscript and Get Your
Data
Published Publier ou Périr: Comment
rédiger et faire publier un manuscrit de
recherche

Venue: B6:
Nechsar

The topics covered in this workshop are how to write a scientific research manuscript (structure and content), scientific integrity and ethics in publishing, submission to a journal and revision of a manuscript and the role of the editor. The first part will be dedicated to providing guidance on the formal requirements of writing a manuscript, facilitated by using illustrative examples and individual exercises. In the second part considerations of how to submit a manuscript and ethical issues will be presented together with participants sharing their own experiences. Revision of manuscripts will be taught through the perspective of an editor with open discussions on how best to respond to reviewers using prepared examples. We will explore reasons for rejection, editorial work and decision making through question and answer time with the editors in the third part.

Les "modèles logiques" tels que le cadre logique sont de plus en plus utilisés par les gestionnaires de projets/programmes et demandés par les bailleurs de fonds comme outil pour aider à la conception, au suivi et à l'évaluation des projets, ce qui contribue à augmenter l'efficacité des projets et leurs impacts. Cet atelier a pour but de démystifier l'approche du cadre logique et de développer les compétences des participants en matière de conception et d'utilisation du cadre logique.

Special Session
Corporate Social Responsibility
La responsabilité sociale commune

Venue: A1: Abay

Countless private sector organizations are involved in the response to HIV and AIDS, including corporate donors, individual philanthropists, religious groups, charities and non-governmental organizations. These organizations vary in size, from small groups such as local churches, to large contributors and corporate donors. Overall, the private sector is by far the smallest of the main sources of funding for the HIV and AIDS response. The Sub-Saharan private sector has contributed modestly toward building or expanding health services. In fact, it has been sidelined despite mounting demands and the exponential growth of the private health sector. Scaling-up the response and sustainability of health initiatives is unthinkable without fully engaging the private sector. This session's aim is to share experiences, leverage and build public-private partnerships (PPP), encourage leadership and networking, and ultimately increase the use of preventive measures and treatment that will mitigate the effects of HIV and AIDS.

Non Abstract Driven Session
Uniting with a Common Agenda for Communicable and Non-Communicable Diseases
S'Unir Avec Un Plan D'Action Commun Pour les Maladies Transmissibles et Non-Transmissibles

Venue: A6:
Simien

Commonwealth Health Ministers at their meeting in May 2011 emphasised the need for focussed attention on the overlap between Communicable and Non-Communicable Diseases.

Globally, 80 percent of the 35million NCD-related deaths in 2008 occurred in developing countries. NCDs accounted for 2.8 million deaths in Africa in 2008. These figures are expected to rise by 27% over the next decade in the region.

The main aim of this session is to raise awareness of NCDs and their linkages to HIV/AIDS in Africa and to sensitise participants to the practical and political issues pertaining to the integration of health systems and services to respond to the dual disease burden.

This session will give participants an opportunity to get an overview of NCDs in sub-Saharan Africa, to learn lessons from the HIV/AIDS experience which can be applied to combating NCDs and learn about practical examples of the integration of services to address Communicable and Non-Communicable Diseases.

Workshop
Publish or Perish: How to Write a Research Manuscript and Get Your Data Published
Publier ou Périr: Comment rédiger et faire publier un manuscrit de recherche

Venue: B6:
Nechsar

The topics covered in this workshop are how to write a scientific research manuscript (structure and content), scientific integrity and ethics in publishing, submission to a journal and revision of a manuscript and the role of the editor. The first part will be dedicated to providing guidance on the formal requirements of writing a manuscript, facilitated by using illustrative examples and individual exercises. In the second part considerations of how to submit a manuscript and ethical issues will be presented together with participants sharing their own experiences. Revision of manuscripts will be taught through the perspective of an editor with open discussions on how best to respond to reviewers using prepared examples. We will explore reasons for rejection, editorial work and decision making through question and answer time with the editors in the third part.

Workshop
Intégrer la Planification, le Suivi et l'Évaluation pour Augmenter l'Efficacité des Interventions liées au VIH/SIDA: l'Approche du Cadre Logique
Integrating Planning, Monitoring and Evaluation to Increase Effectiveness of HIV/AIDS related Interventions: The Logframe Approach

Venue: B7:
Sof Omer

Les "modèles logiques" tels que le cadre logique sont de plus en plus utilisés par les gestionnaires de projets/programmes et demandés par les bailleurs de fonds comme outil pour aider à la conception, au suivi et à l'évaluation des projets, ce qui contribue à augmenter l'efficacité des projets et leurs impacts. Cet atelier a pour but de démystifier l'approche du cadre logique et de développer les compétences des participants en matière de conception et d'utilisation du cadre logique.

The 6th IAS Conference on HIV Pathogenesis, Treatment and Prevention was held from 17-20 July 2011 in Rome, Italy. This session presents a summary of the major novel findings reported at the conference in the various areas of the HIV epidemic and response from basic science to implementation sciences. The major lessons and recommendations from the conference will be discussed with special focus on their implications for Africa.

Religious institutions address the moral and ethical challenges of human society. Anthropologists of religion consider religion a primary regulator of human behavior and capable of controlling impulses toward short-term individual gain in the interests of the long-term collective good. Although the role of religion in changing human behavior is pervasive, it does not, however, guarantee behavioral change in every single individual because of the subjective differences and dispositions of religious institutions. This session discusses the role of religious leaders to the ownership and sustainability of HIV and AIDS response mainly their role in addressing stigma and discrimination and new messages of them to own, scale-up and sustain HIV response. This session enables delegates to perceive the role of religious leaders in operating HIV and AIDS interventions.

Non Abstract Driven Session
PMTCT Services in Africa
Services de PTME en Afrique

Venue: A7:
Lalibela

Prevention of mother-to-child transmission of HIV (PMTCT) is consistent with the goals of HIV prevention and improved child health and survival. A woman with HIV has a 30-35% chance of transmitting the virus to her newborn. With no interventions to reduce transmission, infants will be infected during pregnancy, labor, delivery, and breastfeeding. Recommended PMTCT interventions, including offering antiretroviral drugs, can be undermined if HIV positive women are not counseled well. This session addresses issues related to the role of community in keeping mothers alive; major gaps in addressing PMTCT in Africa; and community contribution to the PMTCT policy development and to the four prongs. This session provides an opportunity for the participants to identify the role of communities at program and policy levels and recognize gaps related to PMTCT services.

This session is designed to show how social media can be incorporated meaningfully into the strategic development, implementation and monitoring of social and behaviour change communication (SBCC) programs for HIV prevention. Because of the extraordinary potential of social media, once integrated into programs, it is a tool that can be used for scaling up the HIV prevention response. This skills building session will illustrate how social media can be integrated into SBCC programs for scaling-up the HIV prevention response.

Workshop
Skill Development on Community Dialogue and Action Renforcement des Compétences en Action et Dialogue Communautaires

Venue: B6:
Nechsar

Community conversation has proven to be an effective social transformation tool particularly in developing countries where the resource is scarce or limited. We have learnt from experience that sustainable changes occur when programs are implemented at grassroots level, in scale and owned by communities. As a system approach, community dialogue and action facilitates the change process by dealing with community concerns from different perspectives; the attitudes of people or mental models, and the system or structural issues and the time dimension. The workshop aims to provide the knowledge and skills needed to design, implement and evaluate community development programs using community dialogue and action through sharing experiences and results from the field, rationalizing the thinking behind the methodology, introducing the tools and their application and providing the big picture to help participants visualize and understand the whole process.

Workshop
Quality Improvement: A Strategy to Promote, Ownership, Sustainability, and Scale-up
Amélioration de la Qualité: Une Stratégie pour Promouvoir, l'Appropriation, le Renforcement et la Pérennisation

Venue: B7:
Sof Omer

In this workshop participants will understand core quality concepts and the quality improvement process. Participants will explore the definition and dimensions of quality; clearly articulate their aims for improvement do problem analysis, formulate indicators, and develop strategies for improvement. They will also explore how this strategy for incremental change is linked to realization of human rights, sustainability, achieving results at scale, and local ownership.

**Non Abstract Driven Session
Towards Efficient Linkage of SRH and
HIV Prevention in Africa
*Vers un alliage efficace de la SSR et de
la prévention au VIH en Afrique***

**Venue: A1:
Abay**

In Africa, the majority of HIV infections are related to sexual and reproductive health (SRH). The promotion of SRH and the mitigation of HIV and AIDS are challenged by the same root causes; including gender based violence and socio-economic vulnerabilities of women and young people. Unmet family planning need might lead to teenage pregnancy, maternal mortality, and unsafe abortion. Effective linkage and integration of SRH and HIV/AIDS interventions are key opportunity for success.

Therefore, this session is designed by the AUC, UNFPA and partners to discuss strategies towards efficient linkages of SRH and HIV prevention in Africa and present emerging good practices. It will show that the AU inducted Campaign for Accelerated Reduction of Maternal Mortality in Africa (CARMMA) is a vehicle for linkage of SRH and HIV prevention; that comprehensive PMTCT (including Prongs I and II) is a vital vehicle for Linkages of SRH and HIV Prevention; it will highlight that young people and adolescents must be the priority target groups who will benefit from an efficient linkage of SRH and HIV prevention. Methodologically, the session will enable participants to share existing knowledge, discuss practical guidance from regional partners and successful country experiences. In all, it will provide opportunity to review evidence of linkages of SRH and HIV prevention, experiences of linkages and integration in the region and political leadership for reduction of maternal mortality and HIV infection.

Non Abstract Driven Session
Public-Private Partnership in Response to HIV, TB, Malaria and STIs
Partenariats public-privé dans la réponse au VIH, à la Tuberculose, à la Malaria et aux IST

Venue: A7:
 Lalibela

Project continuation and sustainability post funding remains debatable. Involvement of project beneficiaries, public-private partnership, social responsibility, private sector involvement, community ownership is some of the highlighted possible solutions to the issue of sustainability of HIV interventions. The private sector in Sub-Saharan Africa has hardly been a participant in key public health services. As a matter of fact, it had been sidelined despite increasing demands while at the same time the private health sector has grown exponentially. Scaling-up the HIV, TB and STIs response and sustainability is unthinkable without the full engagement of the private sector. The objectives of this session is to review and present best practices in public-private partnership, to indicate the role and responsibilities of pharmaceuticals in sustaining the HIV response, to show private sector involvement in scaling-up health care delivery and human resource development. In addition, the session will address questions such as what do we mean by social responsibility, what are the best practices and challenges of public-private partnership in response to HIV, TB, Malaria and STIs programs and provides practical examples. At the end of the session, delegates will get opportunity to ask questions, share their experiences, challenges as well as opportunity for successes.

Intersectionality of HIV and Disability
in HIV Programming and Policy
L'intersectionnalité du VIH et des handicaps dans programmes et politiques sur le VIH

Venue: B4:
Walia

Disability can put people at risk of HIV infection and vice versa. The objective of this session is to show the intersectionality between HIV and disability and enhance the awareness of and better inform policy-makers, HIV-related service providers as well as development workers on the importance of integrating disability into HIV continuum of care towards access for all. It is timely to see the extent of vulnerabilities of women and men with disabilities to HIV and AIDS; disability in people living with HIV; and inclusion, coverage, scope and budget allocation for disability issues in National AIDS Strategic Plans. Panelists from the NGOs, academic and research, UN agency, disabled people's organizations as well as people with disabilities living with HIV will share their expert knowledge and experience during exciting presentations and discussions.

Workshop
Introducing a Framework for Designing Evaluation of HIV-Related Community Level Advocacy
L'introduction d'un cadre pour le concept d'évaluation lié au VIH de sensibilisation au niveau communautaire
Présentation d'un cadre pour l'évaluation de la sensibilisation communautaire au VIH

**Venue: B5:
Nyala**

We increasingly rely on advocacy to bring about change in our communities. But how do we monitor and evaluate advocacy? Much of M&E, a vital component in planning and implementation of policy, programs and services is geared toward service delivery projects and programs. Tracking outputs and assessing results are relatively straightforward. This session explores the challenge of successfully implementing M&E methodologies to track and assess the progress and results of advocacy efforts and introduces new thinking for designing and conducting advocacy evaluation. By the end of this session, participants will be able to: Identify the challenges of measuring the impact of HIV-related advocacy at the community level; Learn new approaches for designing and conducting advocacy evaluations; Practically apply some aspects of the evaluation design processes to their work and specific contexts; and Identify technical resources they can use to evaluate their advocacy effort.

Workshop
The Essential Package: Addressing the Needs of Young Children and Their Caregivers Affected by HIV and AIDS
La Base: Répondre aux besoins des Jeunes Enfants et des personnes s'occupant d'eux atteints du VIH/SIDA

**Venue: B6:
Nechsar**

Very young children often do not receive the external support that is available to their older siblings. However, despite the relative lack of attention to young children affected by HIV and AIDS, there are a growing number of community-based efforts that are attempting to support improved early childhood care and development in AIDS-affected areas. At the end of this workshop participants will: Understand the specific needs of young children (0 to 8) who are affected/infected by HIV and AIDS; Discuss and review the Essential Package framework; Discuss how the essential actions can be adapted to different country context; Learn about indicators and tools that have been developed and tested in several African countries (Mozambique and Zambia) to evaluate young children's well-being; Strengthen one's counseling skills by using the Essential Package Counselling tools; and Exchange examples of how programs are able to meet the needs of young children efficiently and effectively.

Workshop
Key Skills in Ethical Review and Conduct of HIV Research Proposals in Africa
Compétences-clés dans l'examen selon l'éthique des propositions de recherche sur le VIH en Afrique

Venue: B7: Sof Omer

This workshop is aimed to provide update on fundamental concepts of international principles of health research ethics review, review mechanisms and procedures to the participants. The trainers are experts who have years of experience in training Asian and African ethics committees to meet international standards of best practice in their functions of proposal review and management. They will share their accumulated skills with participants. From the workshop, the participants will acquire basic skills in ethics review of HIV research proposals which would also apply largely in other contexts of vulnerability and stigma or discrimination. The experts will present 5 key areas that would be followed by interactive discussions with participants. At the end of the workshop documents on international principles, self assessment tools for ethics review committee, links to source for information will be shared with the participants.

Advances in addressing HIV vulnerability: Women, children and youth and the gender perspective
Avancées dans la manière de gérer la vulnérabilité face au VIH : Femmes, enfants, jeunes et la perspective du genre
Annah Sango, Zimbabwe

Annah Sango is a peer educator and role model to other young women in Bulawayo, Zimbabwe. She is a member of the International Community of Women Living with HIV and AIDS (Southern Africa) and founded her own community-based support group for women affected by HIV. Annah is also a trainer of trainers on issues facing young people and has a certificate in basic counseling. She is a tireless advocate for the reproductive and sexual health rights of young women living with HIV throughout her region, including ensuring their access to woman-initiated prevention options like female condoms.

Treatment as prevention to HIV: Concepts and prospects
Traiter pour prévenir le VIH: Concepts et possibilités
David Serwadda, Uganda

David Serwadda is a Ugandan physician, medical researcher, academic, public health specialist and medical administrator. Currently, he is a professor of public health at Makerere University School of Public Health (MUSPH). He is also a founding member of Accordia Global Health Foundation's Academic Alliance. In the early 1980s, he was one of the earliest physicians in Uganda to recognize HIV and AIDS. He has been a leading researcher in the epidemiology of HIV and AIDS in Sub-Saharan Africa. He has published the findings of his research in numerous medical journals and other peer publications. In 2003, he was appointed Director of the then Makerere Institute of Public Health. He served in that position until 2007 when he was promoted to the position of Dean, MUSPH, following the elevation of the Institute to a constituent School of Makerere University College of Health Sciences (MUCHS). He later step down as Dean of the School of Public Health, but continues to teach and carry out research in his capacity as Professor of Public Health. In Uganda he leads the Rakai Health Science Program, which has significantly contributed to our undertaking of the dynamics of HIV transmission in rural populations in Africa. His expertise has also been sought by the World Health Organization (WHO) in their Department of Reproductive Health and Research and the International Scientific Committee on research pertaining to AIDS and Associated Cancers in Africa.

Challenges and prospects for antiretroviral therapy in Africa: Access and sustainability
Défis et Perspectives des Traitements Antirétroviraux en Afrique : Accès et Durabilité
Phyllis Kanki, USA

Phyllis Kanki has been a professor of Immunology and Infectious Disease at the Harvard School of Public Health since 1999. A virologist with recognized expertise in the pathogenesis and molecular epidemiology of HIV in Africa, she has led AIDS research programs in Senegal for over 25 years. Collaborative studies with the University Cheikh Anta Diop, focused on the identification and reduced transmission of HIV-2, cross protection between HIV-2 and HIV-1, and the various times to disease development for different HIV-1 genotypes. Since 2000, Professor Kanki directed the AIDS Prevention Initiative in Nigeria (APIN), a program funded by the Bill and Melinda Gates Foundation to develop evidence-based prevention interventions with university partners in Nigeria.

In 2004, the President's Emergency Plan for AIDS Relief (PEPFAR) funded the Harvard PEPFAR project, "Rapid Expansion of Antiretroviral Therapy Program". She is the principal investigator of the Harvard program, which provides training, capacity building and targeted evaluation in Botswana, Nigeria and Tanzania while currently supporting access to antiretroviral therapy (ART) for over 155,000 patients.

Right issues in sexual reproduction health and HIV/STIs among the youth
La question des droits de santé reproductive et sexuelle, le VIH et les IST auprès de la jeunesse
Tewodros Melesse, Ethiopia

Mr. Tewodros Melesse was appointed Director-General of IPPF in September 2011. Having worked since 2002 as IPPF Africa Regional Director, he brings more than 27 years of experience with organizations committed to sexual and reproductive health and rights for all. IPPF is the world's largest non-governmental organization working in this field. With a Strategic Framework adopted by over 150 Member Associations it addresses five key areas: Adolescents, HIV and AIDS, Abortion, Access and Advocacy. Mr Melesse is a passionate advocate and is committed to working in strong partnership to achieve change with governments, donors and not-for-profit organizations. His leadership assisted with the development and adoption of the Africa Union Maputo Plan of Action which he believes will save the lives of future women and girls and provides

the necessary policy framework to increase universal access to comprehensive sexual and reproductive health in Africa. Prior to IPPF, Mr. Melesse held the position of Country Representative (Ethiopia) for Pathfinder International. He has a degree in Economics (Catholic University, Louvain, Belgium). A citizen of Ethiopia and a permanent resident of Australia, he is based in the United Kingdom. He is fluent in English and French. Mr. Melesse is married with two adult daughters.

Non Abstract Driven Session Country Ownership and Sustainability of the AIDS Response in Africa *Appropriation par les pays et Pérennisation de la Réponse au SIDA en Afrique*

**Venue: A4:
Tekeze**

The concept of country ownership gained considerable attraction recently. Different forums have been organized both regionally and internationally to discuss what country ownership means and to begin identifying specific strategies to advance the principles in the context of national AIDS responses. This session will promote a shared understanding of the principles and characteristics of country ownership and sustainability based on the findings of the country ownership consultations; discuss progress, bottlenecks, and challenges to ownership of AIDS response, identify the principles, strategies and types of support required by countries and development partners to address the concrete challenges of national ownership of AIDS responses in the region and propose concrete measures for enhancing and promoting national ownership in Africa.

Molecular Epidemiology of HIV in Africa
*Epidémiologie Moléculaire du VIH en Afrique***

The HIV epidemic in Africa is uniquely characterized by a number of HIV types, subtypes and circulating recombinant forms. The dynamic interactions of multiple HIV viruses at a population level leads to unique needs for HIV surveillance. The impact of HIV's genetic diversity on transmission, diagnosis, treatment and drug resistance development is subject to current research efforts, which will be discussed by the panelists representing various nations on the continent.

**Venue: B2:
Abiyata**

Positive Health, Dignity and Prevention (PHDP) highlights and links issues of HIV treatment, prevention, support care and other social services within a human rights framework. Policy framework provides the broad concepts that represent the first steps towards implementing Positive Health, Dignity and Prevention. Speakers in this session discuss issues related to the effective translation of the policy framework on positive health, dignity and prevention to the HIV responses in Africa; and exploring programmatic, policy and financial opportunities to implement PHDP policy framework. This session provides an opportunity for the participants to conceptualize the interrelationship of positive health, dignity and prevention with policy frameworks in Africa.

It is well documented that HIV transmits mainly through sexual interactions and in connection to pregnancy. This attests evident linkage between HIV and sexual and reproductive health (SRH) programs. As a result, over the last several years programmers and researchers advocated for integration of HIV and SRH interventions. Experiences gained from integrated SRH and HIV interventions have demonstrated remarkable achievements. This session aims to provide opportunities for programmers, policy makers and researchers to exchange experiences on integrated interventions that help participants draw more insights.

Workshop
Communities of Practice: The Missing Link to Network HCWs
Communautés de pratique: Le maillon manquant pour mettre les travailleurs de la santé en réseau

Venue: B5:
 Nyala

Communities of practice (CoP) are groups of people who share a concern or a passion for something they do and they learn how to do it better by interacting on an ongoing basis. Over the last years, several communities of practice have been launched at international level. The community counts at the moment more than 500 members and it aims at facilitating information exchange about AIDS treatment and care between Institute of Tropical Medicine (ITM) and HCWs working in resource-limited settings. This workshop includes communication about highlights and challenges of existing projects as well as establishing and communicating best practice models. The CoP discussions include clinical and organizational aspects and aim at improving collaboration between SCART/eSCART alumni and other colleagues.

Facilitators:

soumettre un résumé de conférence*

**Venue: B7:
Sof Omer**

Writing abstract for conferences like ICASA can be difficult, especially for those people who are new to the process. The key to a successful abstract knows what kind of information to include and how to frame it. The first part of this workshop will be dedicated to providing guidance on the formal requirements of writing a conference abstract, facilitated by using illustrative examples and individual exercises (45min). In the second part considerations of how to submit an abstract and the procedure for scoring and selection will be reviewed (20min). We will have an open session in the third part to explore any questions that the participants have or experiences they would like to share that can support others (25min).

WESS07

Special Session
HIV and Bio-Medical Research in Africa
Le VIH et la recherche biomédicale en Afrique

Venue: A1:
Abay

HIV and AIDS continue to plague countries, especially in Africa, providing the impetus to promote research and development strategies to combat the epidemic. While African universities, research councils, and collaborations with international institutions are making progress with groundbreaking investigations, there is still ample opportunity to further develop biomedical research specifically targeted towards HIV and AIDS here in Africa. Moving forward, academics and research experts should consider how to balance lab-based basic biomedical studies versus other areas of health research in HIV and AIDS. However, the ability to conduct sound research also relies on strengthening the biomedical research capacity in Africa by, for instance, ensuring that earmarked funding for HIV and AIDS is appropriately allocated toward establishing centers of excellence on the continent. This session will focus on what strategies and contributions are currently being undertaken to increase awareness of the significance of biomedical research conducted in Africa towards the African response to HIV and AIDS.

The concept of country ownership gained considerable attraction recently. Different forums have been organized both regionally and internationally to discuss what country ownership means and to begin identifying specific strategies to advance the principles in the context of national AIDS responses. This session will promote a shared understanding of the principles and characteristics of country ownership and sustainability based on the findings of the country ownership consultations; discuss progress, bottlenecks, and challenges to ownership of AIDS response, identify the principles, strategies and types of support required by countries and development partners to address the concrete challenges of national ownership of AIDS responses in the region and propose concrete measures for enhancing and promoting national ownership in Africa.

Non Abstract Driven Session
The Global Plan for the Elimination of New Paediatric HIV Infection and Keeping Mothers Alive: What Must We Do Differently?
Le Plan Mondial d'Élimination des Nouvelles Infections de VIH chez les Enfants et Survie des Mères: Que devons-nous faire différemment?

Venue: A1: Abay

Eliminating new HIV infections in children by 2015 and keeping their mothers alive is a priority for the African region and is included in the African Union Outcome Framework. Further, many global partners and national governments have committed to work towards this objective under The Global Plan. The ICASA theme of "Own, Scale up and Sustain" is particularly relevant to the discussions around this ambitious goal to eliminate new pediatric infections and keep mothers alive. As countries plan in line with this commitment, it is critical that national plans are aligned with latest global policies and guidance, global elimination goals, and lessons learned from equity-focused bottleneck analyses. ICASA will provide a forum to discuss the framework and engage a wide range of stakeholders on the agenda of elimination of new pediatric infections and keeping mothers alive. Critical questions will be asked on what needs to be done differently in order to achieve this goal.

7 DecThursday
8 Dec

Nearly four million HIV-positive young people live in Sub-Saharan Africa, 80% of the world total. Of these, most are young women: up to eight young women 15-24 are HIV positive for every male in that age range (UNAIDS, 2010). Most young people in Africa have no access to reproductive and sexual health education and lack sufficient access to sexual and reproductive health services. Furthermore, those youth with the highest risk such as sex workers, men who have sex with men, and migrants, are the least likely to access services. Few programs address structural vulnerabilities that expose young people to new HIV infections, including the millions of unemployed and impoverished youth. ICASA provides an excellent platform to engage and empower young people. Investments in young people by national governments will have great returns for any given nation as young people are the driving force of change. Participants will discuss the facts, issues, challenges and the way forward to build a new generation of leaders.

Non Abstract Driven Session
Challenges in Tuberculosis and HIV Co-Infection
Défis dans les Co-infections de la Tuberculose et du VIH

Venue: A4:
Tekeze

Tuberculosis (TB) is the largest cause of death in AIDS, having caused between a third to a half of all AIDS deaths globally, and is a monumental problem in sub-Saharan Africa. Each infection on its own manipulates the host immune response to enhance the other infection's pathogenicity, and, the treatment of each involves long or lifelong therapy of complicated drug regimens, which impact on treatment of the other. As HIV compromises the immune system, it fuels clinical emergence of TB and as a result has become the driving force of the current TB epidemic, including MDR TB in Africa and Asia. TB in turn drives HIV-1 replication and causes HIV-1 disease progression. The focus of this Symposium is to gain deeper insights into the current treatment issues, immune pathology and deadly synergism between HIV and TB to interrupt the disease cycle.

**Non Abstract Driven Session
Routine Vaccination and Maintenance
of Serological Memory in HIV Infected
Children**

*Vaccination de Routine et Entretien
de la Mémoire Sérologique chez les
Enfants Infectés par le VIH*

**Venue: A6:
Simien**

The use of vaccines in HIV-infected children raises questions regarding the competence of their immune response in mounting a successful defense. HIV infected children are at risk of a range of diseases including those that would normally be prevented by vaccination because of a poor serological memory. Because of low persistence of antibodies to vaccines used in immunization programs, HIV-infected children may require alternative immunization strategies and schedules than currently available. This session assesses the current understating that underlies the B cell damage that leads to poor immune response and how this compromises the long term serological memory of HIV-infected children. Alternative vaccination schedules are presented and novel therapeutic approaches to restore antibody responses during HIV infection discussed.

A Glimpse into the Diaspora's
Perspectives in the War Against HIV/
AIDS in Africa**
*Un aperçu de la perspective de la
diaspora sur la guerre contre le VIH//
SIDA en Afrique*

**Venue: A7:
Lalibela**

The session is intended to carry a message of the Diaspora and highlights the contribution that over the last 30 years in the life of HIV and AIDS and of all associated social, psychological, developmental and economical burdens. The rapid decimation of young heads of household, leaving their young helpless children with no support and unpredictable future in the 80s and 90s was the turning point for the Diaspora's much obliged involvement with the orphan aspect of HIV and AIDS. The initiatives to aid the efforts countries have been taking to ease and in some instances abate the burden of HIV. The work eventually diversified into public information and preventive education, seeking funds for treatment of opportunistic infections, youth programs, job training of orphans and orphan girls' education and care center. At the same time, universities and organizations that established well grounded HIV and AIDS research centers or networking arrangements started participating in knowledge and technology transfer about HIV and AIDS to medical professionals through various media. This session will present and discuss the work of the Diaspora in the fight against the HIV epidemic and future prospects.

Community System Strengthening as a Tool to Own, Scale Up and Sustain the HIV Response**
Système de renforcement des communautés en tant qu'outils d'appropriation, de renforcement et de pérennisation de la réponse au VIH

**Venue: B2:
Abiyata**

The goal of *community systems strengthening* (CSS) is to develop the roles of key affected populations and communities, community organizations and networks, and public or private sector actors that work in partnership with the civil society at community level, in the design, delivery, monitoring and evaluation of services and activities aimed at improving health and HIV and AIDS intervention outcomes. It has a strong focus on capacity development and on human and financial resources, with the aim of enabling communities and community actors to play a full and effective role alongside the health and social welfare systems. This session gives an opportunity for the participants to discuss on issues related to the conceptual understanding and implication of the CSS in our daily work; contribution of CSS to health development in Africa and sharing the experiences we have. The session also provides a platform for dialogue between CSOs and government and development partners on key issues of concern.

Workshop
Approaches to Reach out to "Most at Risk Populations" in "Key Populations"
Approches pour atteindre les „Populations les plus à risque" parmi les „Populations-clés"

**Venue: B3:
Shalla**

Life and activities along the transport corridors entail a mix of communities, workers, informal traders, commercial sex workers - women and men - interacting to exchange goods, to provide services and to survive. Specific life and working conditions of these key populations make them more vulnerable to HIV. This skills building workshop will (a) expose participants to approaches that look at these specificities and at the interlinked needs of the different populations in the corridors; (b) help them planning effective responses that address vulnerabilities as a system of socio-economic factors beyond individual behaviors. In order to ensure interaction and active learning the workshop will combine case study analysis and working groups.

Workshop
Love, Life and HIV: Voices of Young People Living with HIV from Around the World
Amour, Vie et VIH: Voix de jeunes vivant avec le VIH à travers le monde

Venue: B5:
Nyala

'Love, Life and HIV' brings to life, through interviews, the real experiences of young people living with HIV recorded, produced and edited by them in a DVD. The accompanying Love, Life and HIV toolkit is designed to explore the issues raised in the DVD. It provides information on how to reduce HIV-related stigma and discrimination, and develop a greater understanding of what it means to be young and living with HIV. This workshop will include taster activities from the toolkit, which have been designed for young people and could be carried out in secondary schools, universities and youth groups but will also be of interest to health providers, policy makers and advocates working with young people.

Involving Faith Communities in Community Responses to Sexual Violence and HIV
Impliquer les communautés croyantes dans les réponses communautaires à la violence sexuelle et au VIH

Venue: B6:
Nechsar

Monday
5 DecTuesday
6 DecWednesday
7 DecThursday
8 Dec

Sexual violence (SV) is endemic to many communities worldwide but its scale and impact are largely hidden. SV is a recognised HIV risk and transmission factor. Local faith communities represent an established and sustainable grassroots network with unparalleled reach/influence. They have the potential to address SV/HIV with help from governments, aid agencies and donors. The purpose of this workshop is to ensure the understanding on Strengths and challenges of a faith based community response; How to engage with faith leaders creating ownership to effective responses; How to support faith leaders so they may challenge gender inequalities and underlying attitudes/behaviour that exacerbate the SV crisis; How to promote discussions within faith communities on their vision of a goal and pathway towards a full, compassionate, practical, spiritual and prophetic engagement; and How to put flesh on a legal framework of rights for women.

Workshop
Positive Deviance Approach
Approche Positive de la Déviance

Venue: B7:
Sof Omer

L'atelier vise à fournir aux apprenants des connaissances sur l'expérience du sida sur le lieu de travail. Le milieu du travail est un des espaces sociaux où le Comité National de Lutte contre le Sida a autorisé la création de comité ministériel et de comité d'entreprise de lutte contre le sida. Il s'agit de montrer à partir de l'exemple du burkinabè comment le dispositif sida s'institutionnalise sur le lieu de travail. Il s'agit aussi de partager l'expérience du travailleur malade du sida. En effet, l'atelier permettra de mettre en évidence le vécu quotidien de la personne vivant avec le VIH s'opérant sur un environnement de travail dans un processus d'apprentissage de soins biomédicaux, d'affrontement des collègues de travail et enfin de compte de reconversion de la figure de malade dominé à la prise de rôle d'acteur dans la lutte contre le sida. L'atelier permettra non seulement le partage de connaissances théoriques, d'expériences pratiques mais aussi il fournira les outils opérationnels d'observations et d'enquêtes en matière de méthodes en science sociale.

Building Ownership and Sustainability
of Large Scale Care and Treatment
Programs**
*Renforcer l'Appropriation et la
Pérennisation des Programmes de Soins
et de Traitement à Grande Echelle*

Venue: A1: Abay

A broad range of services is provided through large scale care and treatment programs in response to the HIV epidemic within individual countries as well as across regions. The proposed panelists will describe unique models and progress towards the transitioning of large PEPFAR funded care and treatment programs to local non-governmental organizations and governmental institutions. Current progress towards transition with integration of health system strengthening activities will be discussed. Models including partnerships with national, regional and district level governance will be discussed. Panelists will describe efforts to strengthen civil society to support HIV programs through capacity building for existing organizations and the start-up of new NGOs. Many lessons have been learned thus far and the panel's experience and its analysis will ensure that future efforts towards ownership and sustainability of care and treatment programs will continue in the future.

Non Abstract Driven Session Management of Opportunistic Infections and Co-Morbidities in Adults and Children: New Policy Guideline on Cryptococcus
Gestion des Infections Opportunes et des Co-Morbidités chez les Adultes et les Enfants : Une Nouvelle Politique sur la Gestion du Cryptocoque

Venue: A6:
Simien

Cryptococcal infections remain an important cause of mortality in HIV-infected individuals. A systematic review undertaken by the World Health Organization concluded that national guidelines on management of cryptococcal infections lack standardization. WHO held a panel of experts meeting to develop new global guidelines on the management of cryptococcal meningitis and other disseminated cryptococcal infections in July 2011. This session will present the background to the new policy guidelines and discuss the recommendations.

Co-Moderators:

Lule, Frank, Congo
Sow, Papa Salif, Senegal

**Non Abstract Driven Session
Social Services and Changing Roles of
OVCS**
*Les services sociaux et leurs rôles
auprès des orphelins et enfants
vulnérables*

**Venue: A7:
Lalibela**

With more than 22 million people in Sub-Saharan Africa infected with HIV, many of whom are parents, some 70 million children are likely to be enduring the consequences of living with people sick from AIDS. It is estimated that about 12 million children in Sub-Saharan Africa are orphaned as a results of AIDS. Thus, HIV and AIDS epidemic continues to place, an increased burden on families in Africa and on their abilities to meet the needs of their children. Today, providing the bulk of this much-needed care and support is shouldered by grandparents, extended families and children themselves. However, the traditional social norm and role of care and support to extended families are being challenged due to poverty and increasing number of children. Today, finding children abandoned on the streets and children headed-households is not surprising news anymore. This session aims to provoke discussion on the missed opportunities in creating nurtured future generations, understanding vulnerabilities of OVCs, reviewing and highlighting children rights, and in sharing findings on the changing roles of OVCs and the impact of such roles on their well-being and development.

Workshop
Mobilizing for Reproductive Justice:
Recognizing the Rights of People Living
with HIV/AIDS
Mobilisation pour la Justice
Reproductive: Reconnaître les droits
des personnes vivant avec le VIH/SIDA

Venue: B3:
Shalla

Resolution 49/1999 in UN Commission on Human Rights states as "Discrimination on the basis of HIV or AIDS status, actual or presumed, is prohibited by existing international human rights standards, and that the term, 'or other status' in non-discrimination provisions in international human rights texts should be interpreted to cover health status, including HIV and AIDS". This workshop is planned to identify the clear overlaps between the violations of PLHIV's sexual and reproductive rights and their human rights. At the end of the session, participants will have advocacy strategies to rely on, be able to identify reporting mechanisms for human rights violations, and use Human Rights frameworks as part of their work. The workshop will rely greatly on participation from the attendees, their experience and knowledge sharing, and build on these interactions. There will also be small group discussions to complement the larger group sharing.

Workshop
Quantitative Methods for Evaluating Behavioural HIV Prevention Interventions
Méthodes quantitatives pour évaluer les interventions de prévention du VIH comportementales

Venue: B5:
 Nyala

This workshop is designed to equip practitioners of behavioural HIV prevention programs with the skills needed to carry out a quantitative evaluation of the program. The facilitator is a professional statistician and the skills to be imparted will include basic evaluation methodology, how to design an effective questionnaire, how to collect a representative sample, error-free data capturing, and basic techniques for analyzing and presenting data. The workshop will use the WhizzKids United HIV prevention program as a case study in order to be as practical as possible. The workshop will include a PowerPoint presentation and an interactive tutorial using Microsoft Excel which will be made available electronically to participants. At the end of the workshop documents on international principles, self assessment tools for ethics review committee, links to source for information.

Treatment 2.0: New approaches in HIV treatment and prevention

Traitement 2.0 : Nouvelles Approches dans le traitement du VIH et la prévention

Marco Vitoria, Brazil

Dr. Marco Vitoria is an HIV expert at the World Health Organization based in Geneva, Switzerland. He is a senior staff in the WHO Headquarters in charge of care and treatment programs. He has been behind the development and updates of the global guidelines in treatment and care that has been implemented in countries since 2003. Dr. Vitoria has an extensive experience in HIV clinical and program management and previously worked on antiretroviral treatment scale-up in Brazil for the Brazilian National AIDS Program, a pioneer governmental program on HIV and AIDS.

HIV and social justice: Addressing policy and structural barriers to effective HIV responses for key populations (people in closed settings; LGBTI people; sex workers, and people who use drugs)

Le VIH et la Justice Sociale : Aborder les barrières politiques et structurelles empêchant une réponse efficace au VIH pour les populations-clés (personnes en milieux clos, personnes de la communauté LGBTI, travailleurs sexuels, toxicomanes)

Marlise Richter, South Africa

Marlise has a BA (Hons) and LLM degree from Wits University (South Africa) and an MA in International Peace Studies from the University of Notre Dame (USA). She has worked as a researcher for the AIDS Law Project, Treatment Action Campaign and the Reproductive Health and HIV Research Unit. Her research interests lie in feminism and HIV and AIDS with a particular focus on sex work and sexual and reproductive health. Marlise has been an active researcher and advocate on the decriminalization of sex work and the realization of human rights for marginalized groups within the AIDS epidemic. Her work has included collaboration with the African Sex Worker Alliance, the AIDS and Rights Alliance for Southern Africa, and the South African National AIDS Council. Marlise is currently working towards her PhD at the International Centre for Reproductive Health at the University of Ghent (Belgium) and is a visiting researcher at the African Centre for Migration & Society Wits University.

Achieving universal access to HIV treatment for TB patients: Science and politics
Atteindre l'accès universel au traitement pour le VIH et la Tuberculose : Science et politique
Diane V. Havlir, USA

Diane V. Havlir is a professor of Medicine and Chief of the HIV/AIDS Division at San Francisco General Hospital and the University of California, San Francisco (UCSF). She has worked as a researcher and clinician in the HIV epidemic for over 20 years. After earning her MD degree at Duke University Medical School in 1984, she began her medical career as an intern and resident in internal medicine at UCSF. Dr. Havlir spearheaded early studies of opportunistic infection treatment and prophylaxis and conducted pivotal studies on nevirapine viral dynamics, antiretroviral therapeutic strategies, and HIV drug resistance. At UCSF, she is Chief of the AIDS Division and Director of the HIV Translational Research Training Program. She has won numerous mentorship awards for her commitment to training young scientists. She also currently directs several antiretroviral trials evaluating novel strategies for the treatment of HIV and co-infections (tuberculosis and malaria). She leads research studies with Dr. Kamya in Uganda through the Makerere University-UCSF Collaboration. Dr. Havlir's research accomplishments were recognized with the HIV Research Achievement Award of the Infectious Diseases Society of America and HIV Medicine Association. Dr. Havlir was elected to the American Society for Clinical Investigation and is a member of the World Health Organization (WHO) HIV Treatment Guidelines Committee and a founding member of the WHO International HIV Drug Surveillance Program. She served on the Governing Council of the International AIDS Society. In 2006, she was elected to Chair the TB/HIV Working Group of the WHO Stop TB Partnership. She was also the Scientific Co-Chair for the Vienna 18th International AIDS Conference - AIDS 2010. Dr. Havlir is the Co-Chair of upcoming International AIDS Conference in Washington, DC in 2012 - "Turning the tide together."

Financing HIV and AIDS programs in Africa: Hopes and challenges
Financer les programmes sur le VIH et le SIDA en Afrique : Espoirs et Défis
Debrework Zewdie, Ethiopia

Dr. Debrework Zewdie, an Ethiopian national, has dedicated the past 28 years to mitigating the impact of the AIDS epidemic in her diverse capacities as scientist, strategist, manager, policy maker, program implementer, advocate and activist. Dr. Zewdie's 28 years of work experience include managing programs of varying size and complexity ranging from national AIDS programs and international NGOs to international organizations. Before joining the Global Fund, she held different leadership positions at the World Bank for 15 years, most recently as Director of the Global HIV/AIDS Program. Dr. Zewdie received her PhD in Clinical Immunology from the University of London and was a Senior MacArthur Fellow at Harvard University. She has numerous publications in her area of expertise.

THLNADS33

Non Abstract Driven Session
The 2011 Political Declaration on AIDS: Implications for Africa
La Déclaration de 2011 sur le SIDA: Implications Pour l'Afrique

Venue: A1: Abay

At the 2011 UN High Level Meeting on AIDS, a new Political Declaration, "Intensifying our Efforts to Eliminate HIV/AIDS" was unanimously adopted. It sets forth bold new targets and calls on Member States to redouble efforts to achieve, by 2015, universal access, with a view to attaining Millennium Development Goal 6. The Declaration is also commendable for recognizing key populations at higher risk of HIV infection - men who have sex with men, people who inject drugs and sex workers. Countries must now urgently review this new global mandate and determine their own role in reaching the 2015 targets. The most pressing task at hand now is to take the Declaration forward and work with countries - top leadership, civil society, people living with HIV and other key partners.

The session will provide a platform for diverse constituencies to discuss their ideas of what the Declaration means for Africa and how it will be taken forward, particularly how their respective constituencies will take it forward with concrete action. This is a moderated panel discussion with representatives from government, civil society, intergovernmental bodies and the United Nations.

Non Abstract Driven Session
Engaging and Enhancing Communities Capacities Through Conversation and Dialogue: Evidence from Structural Interventions That Support Community Leadership on HIV
Engager et habiliter les communautés à travers le dialogue: Démonstration à partir d'interventions structurelles supportant le leadership de la communauté sur le VIH Leadership on HIV

Venue: A2: Axum

In 30 years of the global AIDS response, the critical importance of community responses for HIV prevention, treatment, care and support has never been in doubt. Yet, how to define, evoke, strengthen and support community responses remains surprisingly unclear. Presentations will include recent evidence from four Sub-Saharan African countries; reports from researchers and implementers that outline their methodology and their interim results, along with a UNAIDS draft practical framework for understanding and selecting from among the different dialogue methods. The moderators will promote discussion on the practical uses of these methods in combination prevention and treatment programs; to strengthen community capacity and leadership; and to promote health-enhancing social change. At the end of the session, participants will be aware of that community dialogue methods “work” when they are selected and implemented strategically. They will be clear on the range of different methods available, and the strengths and limitations of each one.

The Impact of Alcohol and Substance
Abuse on HIV Prevention and
Treatment**
*Impact de l'alcool et de la toxicomanie
dans la prévention et le traitement du
VIH*

**Venue: A6:
Simien**

Alcohol drinkers and injecting drug users are more susceptible to acquire HIV infection and more likely to have fast disease progression. This conclusion from recent clinical and experimental studies calls for strategic community actions for harm reduction. This particular session offers an opportunity to discuss on community actions for harm reduction (experiences from Kenya, Botswana, Mauritius and elsewhere); substance abuse; HAART and non-adherence; risky sexual behaviours related to alcohol and substance abuse and care and support services for alcohol and injecting drugs users in African communities.

|--------------------|------------------|---|-----------------------------|

From UNAIDS 2010 report, punitive laws, policies, practices, stigma and discrimination can undermine effective responses to HIV. Restriction of women's equal access to education, employment, property, credit or divorce; persistence of law enforcement against sex workers, men who have sex with men and people who inject drugs; and overly broad laws on the criminalization of HIV transmission are social and legal barriers for key populations to get access to HIV services. This particular session provides opportunity to discuss the indirect and direct aspects of such barriers; the necessary reforms in the context of universal access to HIV prevention, treatment, care and support services; and experience from Botswana.

Workshop
How to Get Tangible Results from Applying the GIPA Principle
Comment obtenir des résultats tangibles en appliquant le principe GIPA

Venue: B5:
Nyala

Principles of GIPA aim to realize the rights and responsibilities of people living with HIV, including their right to self-determination and participation in decision-making processes that affect their lives. In these efforts, GIPA also aims to enhance the quality and effectiveness of the AIDS response, as countries scale up their national AIDS responses to achieve the goal of universal access to prevention, treatment, care and support services. This workshop contextualizes the application of the GIPA principle within current HIV-related programming. By exploring the role of people living with HIV in Country Coordinating Mechanisms (CCMs), in National AIDS Councils (NACs) and in the delivery of ART, PMTCT and HIV education programs, the workshop will provide practical strategies for program officers and managers, policymakers and advocates to support them in getting tangible results from applying the GIPA principle across their work.

Workshop
**Expanding the Role of Networks of
 People Living with HIV and AIDS**
*Etendre le rôle du réseau d'individus
 vivant avec le VIH et le SIDA (GNP+)*

**Venue: B7:
 Sof Omer**

Networks of people living with HIV and AIDS strives a continent, indeed a world, in which women, men, children and youth living with and affected by HIV and AIDS enjoy dignity, rights, freedoms, opportunities and responsibilities without discrimination. The importance of having networks is to improve the quality of life of people living with HIV and AIDS, through strengthening national networks and associations of people living with HIV and AIDS, co-ordination, advocacy, and information sharing. Using small group interactive exercises, large group discussions, role plays and examples from workshop organizers, facilitators will draw upon participants own experience, knowledge and ideas to help them identify tools, strategies and approaches they need to mobilize and strengthen communities especially PLHIV groups and networks to meaningfully participate and increase access to HIV and STIs services.

Main Aisle

Community Village

The Community Village avails opportunities for showcase achievements, networking, dialogue, and cultural performance. Besides, it is open from 10:30-21:00 hours, Monday through Wednesday and 10:45-15:00 on Thursday during the conference.

Official Opening

Time: Sunday, 4 December 2011, 10:30-11:30

Opening Hours

| | |
|-----------------------|-------------|
| Sunday 4 December: | 10:30-12:00 |
| Monday 5 December: | 10:30-21:00 |
| Tuesday 6 December: | 10:30-21:00 |
| Wednesday 7 December: | 10:30-21:00 |
| Thursday 8 December: | 10:30-15:00 |

Activities of the Village

Community Orientation Session on ICASA 2011

Orientation will be given on how to manage effective and efficient participation of delegates in the various events and sessions of the conference. The Chairs of the Community Program, Leadership Program and the Scientific Tracks will provide brief highlights on the respective sessions.

Co-Chairs: Gabre-Kidan, Tesfai, Conference Program Chair
Kanki, Phyllis, Conference Program Co-Chair

Venue: C1: Harar Jegol

Time: Sunday December 4, 14:30-16:00

Community Dialogue Space

The community dialogue space provides opportunities for convergence among development actors including leaders, financial institutions, CSOs and young people. It will be open to the general public and will directly support the main objectives of the conference. The schedule of Community Convergence sessions is included in the program supplement.

Youth Pavilion

The youth pavilion at the Community Village is youth-focused space for networking, meetings, skill-building, cultural shows, dialogues, evening sessions, etc. The youth pavilion constitutes of different programs that include:

Youth exhibitions: a space to showcase youth programmatic achievements and best practices.

Youth dialogue space: a space/room to facilitate networking opportunities for youth with adults and to continue the momentum of the Youth Pre-Conference.

Youth cultural performance: serves as a youth advocacy hub. It further provides space for arts, culture and music presentations. The performance stage in the Community Village is planned to be shared among different stakeholders and accordingly young people will have cultural shows, learning through dance, fashion shows, and other activities on daily basis.

Other youth related activities: communication including youth website, advocacy and main conference related activities (promotional activities, ensuring the involvement of the largest number of young people).

Women Networking Zone

Women Networking Zone (WNZ) at ICASA 2011 will provide a platform for community-based and community-driven sessions, including facilitated dialogue in the booth and panel discussions in C1: Harar Jugol; workshops and capacity development events; films, poetry readings, performance-based sessions; and exhibition/art installations.

Networking Zone for Key Populations

Events that take place at the networking zone include screening movies/documentaries on human rights, sex work, same-sex sexuality and HIV followed with moderated discussions, dialogue with the leadership.

Exhibition Booth

This will be a space where more than 20 development actors will exhibit their programs at the local level along with accomplishments. This gives insights on successful community level HIV and AIDS interventions.

Village Communautaire

Le Village Communautaire est un lieu donnant l'opportunité à divers groupes de montrer leurs accomplissements, réseauter, dialoguer et présenter des performances culturelles.

Ouverture Officielle

Heure: Dimanche, 4 Décembre 2011, 10:30-11:30

Heures d'ouverture:

| | |
|----------------------|---------------|
| Dimanche 4 Décembre: | 10:00 – 12:00 |
| Lundi 5 Décembre: | 10:15 – 21:00 |
| Mardi 6 Décembre: | 10:15 – 21:00 |
| Mercredi 7 Décembre: | 10:15 – 21:00 |
| Jeudi 8 Décembre: | 10:15 – 15:00 |

Activités du Village

Session d'orientation communautaire sur l'ICASA 2011

Une session d'orientation sera donnée pour que les participants puissent avoir une participation efficace et effective aux différents événements et sessions de la Conférence. Les présidents des Programmes communautaire, leadership et scientifique fourniront de brefs aperçus des sessions.

Co-Présidents: Gabre-Kidan, Tesfai, Président du Programme de la Conférence
Kanki, Phyllis, Co-Présidente du Programme de la Conférence

Lieu: C1: Harar Jegol

Heure: Dimanche 4 Décembre 4, 14:30-16:00

Espace de convergence communautaire

Il s'agit d'un espace de rencontre et de concertation entre les leaders et les acteurs communautaires pour échanger leurs points de vue sur les défis que pose le VIH aux différents intervenants.

L'espace de dialogue communautaire est une salle qui sera gérée par des organisations de la communauté dont les anciens gagnants du prix Ruban Rouge du continent africain. Il sera ouvert au grand public et appuiera directement les principaux objectifs de la Conférence. Le programme des sessions de convergence est inclus dans le programme principal de la Conférence.

Pavillon de la Jeunesse

Le Pavillon de la Jeunesse dans le Village Communautaire est un espace pour les jeunes pour les réunions, le renforcement des compétences, les événements culturels, les forums, les sessions du soir, etc. Tous les événements du Pavillon de la Jeunesse sont coordonnés par le Forum de la Jeunesse et la Coalition Mondiale des Jeunes pour le SIDA en association avec la TaYa comme agent local, ici en Ethiopie.

Expositions de jeunes: Espace pour mettre en avant et montrer les avancées de la Jeunesse.

Espace de dialogue des jeunes: Espace/salle pour faciliter les opportunités de réseautage pour les jeunes avec des adultes et continuer la dynamique mise en place lors de la pré-conférence de la jeunesse. Il est prévu que cet espace de dialogue dans le village communautaire soit partagé entre les différents intervenants de la Conférence mais les jeunes auront quotidiennement une session 4 jours de suite.

Performances culturelles par des jeunes: en plus de servir de centre de plaidoyer pour la jeunesse, le pavillon de la jeunesse fournit un espace pour les arts, la culture et les présentations musicales. La scène du village communautaire sera partagée entre les différents intervenants, les jeunes pourront chaque jour présenter des spectacles de danse, défilés de mode, etc.

Autres activités: Communication comme par exemple le site internet des jeunes, le plaidoyer et les autres activités liées à la Conférence principale (activités promotionnelles, s'assurer de l'implication du plus grand nombre de jeunes, gestion des boursiers, etc.) tel que décrit dans la proposition du front de la Jeunesse de l'ICASA 2011.

Zone d'interaction des femmes

Le réseau des femmes à l'ICASA 2011 fournira une plateforme pour les sessions communautaires dont : Dialogues facilités dans les stands et discussions de panel dans la salle de dialogue ; Ateliers et activités de renforcement des capacités ; Films, poésie, sessions-performances ; Expositions, installations artistiques.

Zone de réseautage pour populations-clés

Les activités suivantes auront lieu dans la zone de réseautage:

Visionnage de films/documentaires sur les droits de l'homme, le commerce sexuel, l'homosexualité, et le VIH suivi de discussions modérées.

Cultural Performance Stage

The stage is a space to share experiences on program performance and entertain the participants and delegates of ICASA 2011 through cultural performances.

CONDOMIZE! Campaign

The CONDOMIZE! Campaign is an initiative that includes condom networking sessions, condom fashion show, Condom Art Pin making, a photography installation about condom manufacturing, city wide condom distribution, and a spectacular CONDOMIZE! Party with upward of 5000 attendees.

Community Celebration

ICASA 2011 recognizes and celebrates award to exemplary community level actors that are actively engaged and demonstrated concrete results in the effort to own, scale-up and sustain the HIV response in Africa.

Community Site Visit

Six civil society organizations (CSOs) in and around the city of Addis Ababa share their experiences in response to HIV and AIDS to delegates during the conference. Vehicles are arranged at pre-scheduled time and place to pick the delegates who registered for each site visit.

Déjeuner avec les Gays: A l'heure du déjeuner tous les jours, AMSHeR tiendra des discussions modérées sur divers sujets tels que la santé sexuelle des hommes et les droits aux outils de prévention appropriés pour les travailleurs sexuels. Le déjeuner sera offert aux participants.

Dialogue avec le leadership: Tous les jours, un leader dans un domaine spécifique sera invité dans la zone pour répondre à des questions en lien avec l'intégration totale des populations les plus touchées dans la réponse régionale au VIH.

Démystifier le Mythe: Ces sessions seront tenues quotidiennement et approcheront les mythes existant sur divers sujets. Travail sexuel, toxicomanie, VIH et homosexualité.

L'entraînement rend parfait: Ces sessions aborderont plusieurs exercices pratiques pour surmonter certains défis économiques rencontrés par les populations les plus touchées. Ateliers sur la sécurité, les rapports sexuels protégés et la production de lubrifiants.

Stands d'exposition

Espace plus de 20 acteurs du développement -ayant soumis leur proposition et été choisis par le comité d'examen des soumissions du village communautaire- vont exposer leurs accomplissements et partager leur expérience et les leçons qu'ils ont tirées.

Scène pour Performances culturelles

La scène est un espace où 11 acteurs en développement vont présenter par le biais d'évènements culturels leurs accomplissements et divertir les participants et délégués de l'ICASA 2011.

Campagne « CONDOMIZE ! »

Les événements de cette campagne comprennent des sessions de réseautage sur les préservatifs, un défilé de mode de préservatifs, de la réalisation de pins avec des préservatifs, une exposition photo sur la fabrication de préservatifs, une distribution de préservatifs à travers la ville ainsi qu'une fête géante « CONDOMIZE ! » avec près de 5000 invités.

Célébration communautaire

L'ICASA 2011 reconnaît et célèbre les acteurs de la communauté qui s'engagent activement dans les efforts pour s'approprier, renforcer et pérenniser la réponse au VIH en Afrique.

Visites sur le terrain

Six organismes de la société civile d'Addis Abeba et sa périphérie vont partager leurs expériences de réponse au VIH avec les délégués durant la Conférence. Des navettes emmèneront les délégués s'étant inscrites pour les visites.
